Coordinator:	Centre for the Study of Health & Society
Subject Overview:	<p>This course will study specific problems in public health from both historical and contemporary perspectives. It will explore five public health issues that have a rich history and continue to pose a contemporary political challenge to national governments and the global community. It is hoped that the historical studies will provide context and insight into contemporary problems. The five public health issues will be tuberculosis; sexually transmitted diseases (syphilis/HIVAIDS); maternal and child health; food quality and obesity; pandemics (influenza/SARS).</p> <p>This course will study specific problems in public health from both historical and contemporary perspectives.
