Coordinator:	Centre for the Study of Health & Society
Subject Overview:	<p>This subject reviews the historical, social, economic and cultural factors influencing structures and practices central to the policy process in Aboriginal health. Students explore the context of the policy process at macro, meso and micro levels in terms of current evidence concerning health status, key health demographics, social determinants of Aboriginal health, models of health and illness, funding approaches and equity questions. They examine federal, state and local jurisdictions in Aboriginal health policy, capacity issues and enablers and barriers to policy implementation. The subject covers governance in Aboriginal health, participation, conceptual models of health and illness, social justice questions and policy approaches such as community control, partnership, shared responsibility, whole-of-government and self-determination. The content is brought into focus through specific analysis of particular Aboriginal health policies and consideration of the practice implications for socially aware, self-reflexive health professionals.</p>
Assessment:	Case study: 15 minute oral presentation with accompanying PowerPoint notes and 500 word briefing paper due mid semester (40%). Essay totalling 3, 500 words due end of semester (60%).
Prescribed Texts:	None
Recommended Texts:	A set of recommended readings will be available for purchase.
