Coordinator:	Dr L Remedios
Subject Overview:	<p>This integrated subject is a continuation of Physiotherapy 1. The objectives for Semester 2 are to further develop the study of the theory and practice of physiotherapy within the three themes: communication skills, human movement and clinical practice. Concepts of normality and abnormality in relation to the human mind, the role of motivation and adherence in physiotherapy practice and further issues of health ethics and evidence-based physiotherapy practice will also be examined.</p> <p>Content areas include regional structure and function in normal and pathological states and scientific bases of soft tissue injuries and biomechanics of these tissues. Theory and practice of assessment and management of musculoskeletal injury will be covered including manual assessment, treatment including exercise prescription and movement analysis of normal and injured individuals. Teaching and motivating patients, physical and psychological interactions in illness and injury development and the structure of physiotherapy practice will be included. The clinical practice component will address the application of the above principles in a clinical environment across the life span.</p>
Assessment:	Written material up to 1500 words, which may include essays, projects or critical appraisal of literature (15%); end-of-semester written examination two 2-hour papers (40%); practical examinations which may include video making, presentations and clinical skills (35%); tutors assessment (10%); clinical attendance (hurdle requirement); and participation in two research projects (hurdle requirement).
