Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability</p></p>
Coordinator:	Associate Professor Steve Howard
Subject Overview:	The internet is now a familiar part of everyday life. But what exactly is the Internet? What is it used for? And how is it implicated in the transformation of society, culture, community and even our own sense of identity? This subject examines these and other critical questions in exploring the complex interplay between the technical and social dimensions of the internet. Among the topics we cover here are the emergence of new forms of media culture, art, and commerce online, the nature and limitations of virtual communities and the implications for personal identity and intimacy, and the complex legal, ethical, and political issues which arise through activity on the internet. Tutorials and lectures will equip students with the knowledge needed to critically appraise the interrelations between the internet and society, and laboratories will be used to build basic technical skills. Students taking this subject will also have "hands-on" experience in participating in an online community
Assessment:	Compulsory participation in both on-line forums and in tutorials: 20% of which 10% is peer review and 10% is tutor assessed participation based on presence, quality, insight and constructiveness (a detailed template will be provided to students). This assessment will take place throughout the semester, on a week-by-week basis. Two written assignments: 40% each Students choose 2 out of 3 assignment options, each of which is equivalent in difficulty and required effort. • Each assignment is worth 40%, 2000 word equivalent per assignment • Students can choose to complete all three assignments, with the two highest scoring assignments counted towards their final grade. • The first of the assignments will be due mid-semester, and the second at the completion of the semester.
Prescribed Texts:	There are no prescribed texts for this subject. The students will be given a reading pack, and extensive use of on-line resources will be made.
Breadth Options:	This subject potentially can be taken as a breadth subject component for the following courses: # Bachelor of Arts

	<ul style="list-style-type: none"> # Bachelor of Biomedicine # Bachelor of Commerce # Bachelor of Environments # Bachelor of Music # Bachelor of Science # Bachelor of Engineering <p>You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.</p>
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
