Subject Overview:	This subject is an introduction to a range of issues about development in the 'third world'. It will explore the basic concepts used in development literature in addition to the many ways that development is understood and applied. Concepts such as 'third world', 'aid' and 'globalisation' will be critically examined. The key development institutions will be introduced through the use of case studies. The subject will consider the role of local knowledge, grass roots schemes, industrialisation, appropriate technology, empowerment, globalisation and modernity in development in the 'third world'. At the end of the subject students should be able to discern a range of modernities, approaches to development, and development alternatives that pertain locally within the broader political economies of the 'third world'.
Objectives:	<ul style="list-style-type: none"> # recognise that perceptions of quality of life and standards of living differ according to the criteria used to determine these; # understand the non-government organisation approach and industrial growth approach to the problems confronting Third World countries; # be familiar with the main development issues of the Third World, and be able to apply different development principles in the search for solutions to problems; # have some knowledge of the forces operating in the global economy which differentially affect Third World countries.
Assessment:	One 1000-word assignment worth 30% (due in week 6), an essay of 3000 words 60% (in the last week of semester) and tutorial participation 10%.
