Coordinator:	Dr Giuliana Fuscaldo
Contact:	Centre for Health and Society School of Population Health
Subject Overview:	This subject introduces students to the classic debates in bioethics about reproduction, life and death. Specific topics may include: active and passive euthanasia, abortion, organ transplantation, reproductive and genetic technologies (e.g. cloning, pre-natal diagnosis and embryos research), among others. There will be a focus on key theoretical issues, such as the notion of moral status, the concept of personhood, the claimed moral distinction acts and omissions, the so-called Doctrine of Double Effect, obligations to future persons and the non-identity problem, and so on. Normative moral theory will be discussed as it relates to key topics and issues.
Objectives:	*
Assessment:	Review of set readings totalling 1,500 words, due mid semester (30%) Essay of approximately 2,500 words due at end of semester (70%).
Prescribed Texts:	None
