<b>Subject Overview:</b>	This subject examines the diverse ways people have gone about 'making a living', and the ways anthropologists have sought to explain them. The focus is on the social relations involved in production and reproduction of material life, and on the importance of culture and environment in the construction and transformation of those relationships. Ethnographic examples from systems of different complexity are used to explore the diverse ways in which production, consumption and exchange may be organised and understood, and the ways these domains are articulated. Students should not only become familiar with local economies, but with the emergence of a global economy and the ways it is transforming local and regional logics.
<b>Objectives:</b>	<ul style="list-style-type: none"> <li># have an understanding of the economic and political organisation of people in traditional tribal and peasant societies and those societies that are moving toward Western modernisation and development;</li> <li># have examined the interrelationships of subsistence economies, politics and acculturation in non-Western and localised societies;</li> <li># have an acquaintance with anthropological techniques of analysing economic and political behaviour in non-Western societies.</li> </ul>
<b>Assessment:</b>	A 750 word class paper 20% (due mid-semester) a tutorial presentation and 500 word paper 20% (due during semester) and a 2500-word essay 60% (due at the end of semester). A hurdle requirement of participation in 8 of 10 tutorial (ie 80% of tutorials).
<b>Prescribed Texts:</b>	A subject reader will be available from the University Bookshop at the beginning of semester. Set readings will also be available online, through LMS.
