## 960-TC Master Of Education (Teaching Content Through English) 2009 Year and Campus: Fees Information: Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees Level: Graduate/Postgraduate **Duration & Credit Points:** Contact: **Education Student Centre** Alice Hoy Building Course Overview: Where specific training for teachers involved in CLIL is offered, emphasis is placed on the interdisciplinary nature of the activity with insights drawn both from second language acquisition and teaching and content subject pedagogy, as does the course proposed here. In addition, since the teachers involved in this relatively new teaching activity must provide leadership for those who follow, it is important that those taking this course acquire both an understanding of the principles underpinning the activity and that they be able to apply those principles to the practical teaching situation and the management of CLIL programs in schools. This course provides students with the opportunity to develop an understanding of those basic principles, to survey the available research, courses and teaching materials, and to apply that knowledge in classroom practice. THIS COURSE IS NOT OFFERED IN 2009. Please see the Professional Certificate in Education (Teaching Content through English) for 2009 availability. Students who have completed the Master of Education (Teaching Content through English) **Objectives:** should be able to demonstrate: # an understanding of the pedagogical, linguistic, sociolinguistic, cultural and cognitive issues that impinge on the success of courses taught through a second or foreign language # understanding of the cross-cultural issues involved in teaching through English # knowledge of the general pedagogical principles and practice entailed in teaching through a second or foreign language, including such issues as an understanding of the role of the first language, code switching, and bilingual dialogue ability to apply their understanding of the theoretical issues and the pedagogical principles # to their teaching practice a high level of competence in the practice of teaching their content subjects through English # to students whose first language is other than English familiarity with the different approaches that have been adopted to 'content language integrated teaching, the literature on this activity and the worldwide research that has been undertaken on it # ability to identify and evaluate successful classroom practice in CLIL, both their own and others' understanding of the differences between the language of the everyday world and that of the world of the particular discipline (e.g., science, mathematics or technology) and how bridges may be built from the discipline-specific discipline to the everyday language # ability to identify the learning needs of students in CLIL programs # ability to support the language needs (cognitive, linguistic and affective) of students learning through a second or foreign language, to facilitate their comprehension and learning of the content, and to help students developing their language through a discipline also to develop their general proficiency and their ability to communicate outside of their discipline ability to plan a syllabus and teaching program (for a discipline taught through English) # situated within an understanding of the whole curriculum and to apply it to their own teaching context # familiarity with the available materials for the teaching of their discipline(s) through English and an ability to adapt materials to suit their students' needs awareness of the management activities required to support the introduction of CLIL programs at any level of education but especially in schools awareness of the social and political issues, including for management, related to multiple languages in educational institutions (in particular, the implications of the global role of English)
