Subject Overview:	Students undertake a research project over the semester, thereby gaining experience in posing research questions, searching the literature and in using basic research methods for collecting and analysing data and presenting the results in a competently written research project report. Regular meetings will be held with the supervisor during the semester for gaining advice on the study topic and technical matters. Material prepared in 705-444 (ABPL40041) Research Methods, is expected to form an integral part of the final research report.								
Objectives:	-								
Assessment:	A 10,000 word research project report. However, the 5000 words of assignments produced for 705-444 (ABPL40041) Research Methods, are expected to be refined and incorporated as part of the final report. Students must also orally present their projects in mid-semester. Although this mid-year seminar is not assessed, the report will not be accepted for examination unless a presentation has been made. Appropriate examiner(s) other than the supervisor will examine the final research report.
