Subject Overview:	This subject was formerly known as Managing Change.
	All practitioners in the built environment need at some point to be aware of the strategies and techniques that can be employed to elicit constructive involvement from the public, and to negotiate changes to environments where we live, play, and work. This subject will impart to students the skills involved in encouraging and managing participation in planning and designing the built environment. These skills include:
	# Meeting facilitation
	# Community consultation and participation
	# Cross-cultural learning
	# Negotiation, mediation, consensus-building# Evaluation of community participation processes.
	# Evaluation of community participation processes. There will be considerable reliance on hands-on exercises based on case studies from around the world. The subject aims to be relevant to urban and social planners, landscape architects, urban designers, architects, property professionals, community developers and environmental activists.
	On completion of this subject, students should have:
	# Knowledge of community and built environment change processes
	 Techniques and skills involved in encouraging and managing participation and consensus-building in the planning and design of changes to our natural, working, and living environments Ability to analyse their past and current experiences in built environment processes in light of heightened knowledge and understanding Ability to write and discuss clearly and persuasively on topics related to the process of change in the built environment
