Subject Overview:	A consideration of professional requirements and the issues arising for practitioners from a variety of professional backgrounds working in the criminal justice system. These include legal matters concerning expert testimony in court, such as admissibility of expert evidence, the ultimate issue rule, the use of psychological syndrome evidence in criminal trials, how the criminal law takes into account mental impairment and when and why different groups of professional may be called to give evidence in criminal courts. Consideration is given to the various areas within which professionals work in the criminal justice system, particularly in presentation of expert evidence and preparation of reports for the courts, tribunals and parole boards. Theoretical discussion includes matters arising in capacity to provide consent and right to treatment. Extensive coverage is given to ethical issues and problems that relate to the particular context of forensic practice for different professional groups.
Objectives:	<ul style="list-style-type: none"> # be aware of the various tasks required of psychologists in forensic practice. # understand key practical and ethical issues arising in different areas of forensic practice. # understand how the law applies to the exercise of forensic psychologists' duties. # have gained practical experience in presenting evidence in legal settings.
Assessment:	Written work of 5000 words (100%) due at the end of semester.
