ISYS90056 Information Systems Research Proj Minor

Dates & Locations: 2010, Parkwille This subject commences in the following study period/s: Semester 1, Parkwille - Taught on campus. Semester 2, Parkwille - Taught on campus. Semester 3, Parkwille - Taught on campus. Semester 3, Parkwille - Taught on campus. Semester 3, Parkwille - Taught on campus. Semester 2, Parkwille - Taught on campus. Semester 3, Parkwille - Taught on campus. Semester 5, Parkwille - Taught on campus. Semester 5, Parkwille - P		ts: 50
Time Commitment: Time Commitment: Contact Hours: . Total Time Commitment: This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus. Contact Hours: . Total Time Commitment: This subject is an individual research project a weekly contact hours will vary depending on the nature of the project. Students should dithis with their supervisor but as a guide, a student enrolled in a 50 point research project avoid be expected to be engaged in their research for an average of forty hours per wee 480 hours for the semester. Students enrolled in a 37.5, 25 or 12.5 point research subject be expected to be engaged in their research on a pro-rata basis. Prorequisites: None Corequisites: None Recommended Background Knowledge: Non Allowed Subjects: 615-496 Information Systems Research Project; 615-498 Information Systems Research Project. Core Participation Requirements: University policy to take all reasonable steps to minimise the impact of disability upo academic study and reasonable steps will be made to enhance a student's participation University's programs. This subject requires all students to actively and safely participate laboratory activities. Students who feel their disability may impact upon their participation encouraged to discuss this with the subject coordinator and the Disability Liaison Unit. Coordinator: Dr Reeva Lederman Students undertake an original investigation of a topic relevant to Information Systems (cognate discipline). Specific research projects will depend on the availability of approprie expertise, but may address a range of issues within Information Systems research. Universities, of the participation of an academic researcher, students are required to design and conduct a research investigation. This would typically involve a literature review, data of conduct a research investigation. This would typically involve a literature review, data of an academic research project subjects as indicated below (earth of the participation of the avail		9 (Gr

Objectives: On completion of this subject students should have:		

Page 1 of 2 01/02/2017 6:18 P.M.

	- a comprehensive understanding of the process and practice of research in Information Systems;
	- a sophisticated understanding of the Information Systems discipline;
	- developed expertise in the area of their research project;
	- completed a substantial piece of original research; and
	- the necessary skills for further advanced research in Information Systems (e.g. in doctoral studies).
Assessment:	The assessment requirements below are applicable to the entire 50 point Research Project: (i) a thesis of no more than 12,000 words submitted at the end of the research (worth 100% of the overall score) and (ii) two oral presentations; one presentation at the project proposal stage and another presentation with final the report. Both presentations are hurdle requirements.
Prescribed Texts:	None.
Recommended Texts:	None.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	On completion of this subject students should have developed generic skills in:
	- conducting independent research;
	- analysing and synthesising technical research;
	- conducting critical evaluation of research;
	- communicating their research in scholarly reports and in public presentations; and
	- time management and project management.
Related Course(s):	Master of Science (Information Systems)
