Subject Overview:	This subject considers contemporary issues relating to the professional responsibility associated with assuming advanced practice roles. Students are guided to appreciate the history and development of advanced practice and the role of the advanced practitioner as it is positioned within the local and global health care environment. Health policy is considered as a driving force for development of advanced practice and health policy implications of extended practice are critiqued. The regulations governing nurse accountability are analysed and the relationship between accountability, legislation, licensure, certification and credentialing are examined. Legal and ethical issues relating to advanced practice are considered. The need to monitor and evaluate the contribution of advanced practice activities to health outcomes is explored within a framework of clinical governance and students learn how to use clinical audit processes relevant to their advanced practice role. The importance of leadership as a component of advanced practice is emphasized. Students participate in learning activities to identify leadership qualities, develop their leadership potential and develop their skills in disseminating knowledge using a variety of verbal and written methods. An on-campus class forum provides students with the opportunity to demonstrate their ability to contextualise the content of this subject and debate key issues.
Objectives:	Following completion of this subject it is expected that the student will be able to: <ul style="list-style-type: none"> • Define advanced nursing practice and contextualise it to their area of specialty; • Discuss the history of advanced nursing practice on an international and local level; • Clearly define the role of the Nurse Practitioner;

	<ul style="list-style-type: none"> • Discuss factors that influence the development and implementation of advanced practice roles, such as that of the Nurse Practitioner, including; stakeholders, clinical practice guidelines, socialisation factors and leadership; • Discuss the endorsement process leading to registration as a Nurse Practitioner.
Assessment:	Student led tutorial activity = 2,000 words (20%) (Determined by Students) Weekly on-line activities 6 x 300 word = 1800 words (20%) (weeks 3-9) Assignment = 5000 words (60%) (week 12) Total Words = 8,800 words
