Subject Overview:	This subject deals with major questions in epistemology and metaphysics, as well as the relation between epistemology and metaphysics. It will consider central questions in epistemology, such as the following. What is knowledge? What is the relation between knowledge and justified belief? Is knowledge possible? Is certainty necessary for knowledge? It will also explore such topics in metaphysics as the nature and structure of reality, the existence of objective kinds in nature and the relation between reality and truth. In addition, it will explicitly raise the question of the relationship between epistemology and metaphysics. For example, it will consider whether it is possible to meet the challenge of epistemological scepticism on the basis of metaphysical views about the structure and nature of reality. Among other topics, the subject will explore the relevance of contemporary theories about natural kinds to concerns about the justification and/or reliability of inductive inference.
Objectives:	Students who successfully complete this subject will
	 # gain a sound general comprehension of the major recent advances in our philosophical understanding of the nature and structure of knowledge. # understand the roles of experience and reasoning in contributing to this structure.
	# display a familiarity with some major texts on which these advances are based.
	 # indicate an awareness of how the subject matter is related to broader concerns in contemporary philosophy. # display acquaintance with some important past contributions to the discussion of those issues.

	# have the ability to explain in detail and critically discuss at least two important aspects of these recent advances.
Assessment:	A 1500 word essay valued at 30% due about mid-semester, and a 2500 word essay valued at 70% due at the end of semester.
Prescribed Texts:	Hilary Kornblith, Inductive Inference and its Natural Ground (MIT 1993) Noah Lemos, An Introduction to the Theory of Knowledge (Cambridge University Press) 2007In addition, a subject reader will be available from the University Bookshop at the start of semester.
Breadth Options:	This subject potentially can be taken as a breadth subject component for the following courses: # Bachelor of Biomedicine (https://handbook.unimelb.edu.au/view/2010/B-BMED) # Bachelor of Commerce (https://handbook.unimelb.edu.au/view/2010/B-COM) # Bachelor of Environments (https://handbook.unimelb.edu.au/view/2010/B-ENVS) # Bachelor of Music (https://handbook.unimelb.edu.au/view/2010/B-MUS) # Bachelor of Science (https://handbook.unimelb.edu.au/view/2010/B-SCI) # Bachelor of Engineering (https://handbook.unimelb.edu.au/view/2010/B-SCI) # Bachelor of Engineering (https://handbook.unimelb.edu.au/view/2010/355AA) You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/ breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	 # be able to understand both the heart of a philosophical issue and its broader implications. # have learnt to form a critical understanding of philosophical texts. # have developed their skills to construct rigorous philosophical arguments.
