<b>Overview:</b>	The Software Engineering stream of the Bachelor of Engineering (for students commencing in 2008 and later years). See Bachelor of Engineering (B-ENG)																																				
<b>Objectives:</b>	See Bachelor of Engineering (B-ENG)																																				
<b>Structure &amp; Available Subjects:</b>	Completion of 400 points of study culminating in an advanced software engineering project in the final year.  The structure of the Bachelor of Engineering degree requires completion of specific subjects as part of this stream. The majority of subjects have one or more prerequisites and therefore the sequence in which subjects are taken is very important. It is unlikely that prerequisite waivers will be granted for these engineering subjects and therefore students should take care to select subjects in one study period that satisfy prerequisites for subjects in later study periods.
