Subject Overview:	Business Reporting Systems provide business users with accounting information for organisational visibility; decision making; planning and control; process management and training. This subject identifies and describes a variety of business reporting systems including inter-organisational systems across a value chain to determine how their capabilities and reporting functions meet the users' business needs. Outputs from these systems include for example, financial statements, budget performance reports, balanced scorecards, and sales and marketing reports. Students will gain an understanding of business data capture, system features and reporting functionality.								
Objectives:	Information not available.								
Assessment:	A 2-hour end-of-semester examination (50%), one group assignment equivalent to not more than 3000 words due mid-semester (25%) with presentations (20%) and class participation (5%).
