Coordinator:	Dr Dianne Toe
Contact:	Education Student Centre
Subject Overview:	This subject will explore deafness from a wide range of perspectives including social, cultural, and technological. It will examine deafness from a linguistic and cultural view to gain insight into human communication and the relationship between culture and language. This subject will investigate the impact of deafness on communication, literacy, social development, access and equity, and also consider how technology impacts on the lives of people who are deaf. The rapid changes in technology and its impact on communication will be discussed. Other topics covered will include a brief introduction to sign language, bilingual approaches to learning, deaf culture, the cochlear implant, the development of spoken language in deaf children, and deafness and ageing.
Objectives:	<ul style="list-style-type: none"> # Understand the central role of communication in society and that deafness primarily impacts upon communication; # Develop an understanding of the full range of perspectives of deafness, including medical, social and cultural; # Understand the benefits and limitations of technology in the lives of deaf people; # Compare the range of educational approaches available to children and young people who are deaf and consider the implications of these for academic and social development.
Assessment:	There are two pieces of assessment: one practical assignment due mid-semester; (50%); one 2000 word essay due during the examination period (50%).
Prescribed Texts:	Course readings will be provided
