<b>Subject Overview:</b>	This subject is concerned with the roles that plants play in landscape architectural design. Students will be introduced to exotic and native plant materials that are frequently used in landscape design and revegetation in south-eastern Australia. This includes learning basic plant taxonomy and the common and botanical names for a range of useful ornamental and ecological important plant materials. Spatial, aesthetic and functional uses of plants in landscape design will also be introduced.
<b>Objectives:</b>	<ul style="list-style-type: none"> <li># To develop an understanding of the aesthetic, functional and ecological contribution of native and non native plants and plant communities to the contemporary landscape.</li> <li># To develop an understanding of planting design principles and representational conventions.</li> <li># To expose students to the theoretical considerations associated with the use of plants in the landscape.</li> </ul>
