

ISYS90065 Information Systems Research Proj Major

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2012, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus. Semester 2, Parkville - Taught on campus.
Time Commitment:	Contact Hours: This subject is an individual research project and weekly contact hours will vary depending on the nature of the project. Total Time Commitment: Students should discuss this with their supervisor but as a guide, a student enrolled in a 50 point research project subject would be expected to be engaged in their research for an average of forty hours per week or 800 hours for the semester. Students enrolled in a 37.5, 25 or 12.5 point research subject would be expected to be engaged in their research on a pro-rata basis.
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	It is University policy to take all reasonable steps to minimise the impact of disability upon academic study and reasonable steps will be made to enhance a student's participation in the University's programs. This subject requires all students to actively and safely participate in laboratory activities. Students who feel their disability may impact upon their participation are encouraged to discuss this with the subject coordinator and the Disability Liaison Unit.
Coordinator:	Dr Reeva Lederman
Contact:	Email: reeva.lederman@unimelb.edu.au (mailto: reeva.lederman@unimelb.edu.au)
Subject Overview:	Students undertake an original investigation of a topic relevant to Information Systems (or cognate discipline). Specific research projects will depend on the availability of appropriate expertise, but may address a range of issues within Information Systems research. Under the supervision and guidance of an academic researcher, students are required to design and conduct a research investigation. This would typically involve a literature review, data collection and data analysis. The results will be reported as a thesis and in a public presentation. In most instances, it is expected that the results will also be submitted for publication in a conference or journal.
Objectives:	On completion of this subject students should have: <ul style="list-style-type: none"> # a comprehensive understanding of the process and practice of research in Information Systems; # a sophisticated understanding of the Information Systems discipline; # developed expertise in the area of their research project; # completed a substantial piece of original research; and # the necessary skills for further advanced research in Information Systems (e.g. in doctoral studies).
Assessment:	The assessment requirements below are applicable to the entire 100 point Research Project: (i) a thesis of no more than 22,000 words submitted at the end of the research (worth 100% of the overall score) and (ii) two oral presentations; one presentation at the project proposal stage and another presentation with final report. Both presentations are hurdle requirements.

Prescribed Texts:	None
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>On completion of this subject students should have developed generic skills in:</p> <ul style="list-style-type: none"># conducting independent research;# analysing and synthesising technical research;# conducting critical evaluation of research;# communicating their research in scholarly reports and in public presentations; and# time management and project management.
Related Course(s):	Master of Science (Information Systems)
