

Sustainable Forests

Year and Campus:	2013
Coordinator:	Dr Chris Weston (MSLE)
Contact:	<p>Office for Environmental Programs Ground Floor, Walter Boas Building (building 163)</p> <p><i>Enquiries</i> Phone: 13 MELB (13 6352) Email: 13MELB@unimelb.edu.au (mailto:13MELB@unimelb.edu.au)</p>
Overview:	<p>Sustainable Forests is offered as a major field of study in the Master of Environment degree.</p> <p>Forest landscapes and ecosystems have a massive impact on all our lives as evidenced by the 2009 bush fires in Victoria. The Sustainable Forests major looks at issues related to management of carbon, water, fire and biodiversity at landscape scales in relation to forests with a view to making them more sustainable. We study the challenges of fire management, the role of forests; In climate change management, environmental policy and timber and non-timber production.</p> <p>Study biological, economic, social and environmental factors that impact on forests; the development of forest and natural resource management enterprises both in Australia and internationally, and carbon sequestration and water resource management.</p> <p>Students can expect to develop skills in forest ecosystem sciences; sustainable forest management; and the design, conduct and analysis of forestry research.</p> <p>Suitable for professionals and aspiring entrants to the forest and natural resource management sectors, we will prepare you for middle and upper management positions within the forest and natural resource management and provide a pathway to further study.</p>
Objectives:	<p>Students who complete the Master of Environment will have:</p> <ul style="list-style-type: none"> • An advanced understanding of environmental issues • Advanced skills and techniques applicable to changing and managing the environment • An ability to evaluate and synthesise research and professional literature in the chosen stream or focus of study • An advanced understanding of the international context and sensitivities of environmental assessment <p>The graduate attributes for the Master of Environment are:</p> <ul style="list-style-type: none"> • Expertise in multidisciplinary understanding, analysis and research with an environmental focus • Collaborative approaches to environmental problem solving • Capacity to engage in critical social and sustainability questions <p>The Master of Environment generic skills are:</p> <ul style="list-style-type: none"> • Multidisciplinary and trans-disciplinary knowledge and research of environmental relevance • Collaborative environmental management skills • Capacity for independent learning across discipline boundaries <p>The Sustainable Forests major will prepare professionals and aspiring entrants to the forest and natural resource management sectors for management positions within the forest and natural resource management sectors by:</p> <ul style="list-style-type: none"> • Developing knowledge, skills, understanding and competence in the area of forest ecosystem sciences; • Developing a thorough approach to forest sciences and sustainable forest management through an understanding of the biological, economic, social and environmental factors which shape the development of forest and natural resource management enterprises both in Australia and internationally, including climate change science and water resource management; • Increasing knowledge and analytical capabilities appropriate to forest and ecosystem science and related specialist disciplines; • Developing competence in the design, conduct and analysis of research questions and experimental work, particularly for those students interested in pursuing a research career; • Extending scholarly and critical attitudes in forest and natural resource management disciplines.

Structure & Available Subjects:	<p>Students will be required to complete the two core subjects, plus choose three subjects from the compulsory subject list and undertake electives to make up the balance of the award. The selection of electives is made in consultation with the Sustainable Forests major coordinator.</p> <p>For a current list of subjects offered in the Sustainable Forests major, please refer to the course information page at: http://www.oep.unimelb.edu.au/currentstudents/master_of_environment/specialist_paths_of_study/sustainable_forests (http://www.oep.unimelb.edu.au/currentstudents/master_of_environment/specialist_paths_of_study/sustainable_forests)</p>
