Subject Overview:	<p>The internet turned 20 in 2012, and remains the fastest growing medium of communications. It is also a uniquely democratic means of communication, blurring the traditional boundaries between publisher and reader. It has created unparalleled opportunities for sharing, fully duplex peer communications and novel types of social media. Nevertheless the legal rules governing it remain unsettled and are arguably too old-fashioned for the modern environment. These developing legal rules and norms are the focus of this subject, taught by international expert Dan Hunter of New York Law School, media lawyer Jonathan Gill, partner at Carrick, Gill, Smyth and Megan Richardson of Melbourne Law School. Topics to be considered include copyright laws related to user-generated content, the regulation of social networks, privacy, libel tourism, online obscenity and collaborative internet-based contracting. The subject also canvasses difficult theoretical issues, including the nature of democratic governance in a borderless world, regulatory arbitrage and the appropriate basis for liability where internet businesses encourage others to offend.</p> <p>Principal topics will include:</p> <ul style="list-style-type: none"> # Overview of technology and avenues of distribution # Copyright and allied rights in online services # Commissioning and licensing material # Regulation of transnational online products and services # Internet contracting and consumer protection issues

	<ul style="list-style-type: none"> # Censorship of material distributed via online services # Defamation and privacy # Obscenity # Journalists and the internet # Theoretical issues such as the nature of democratic governance in a borderless world, regulatory arbitrage and the appropriate basis for liability where internet businesses encourage others to offend.
Objectives:	<p>A student who has successfully completed this subject should:</p> <ul style="list-style-type: none"> # Have a good understanding of the regulatory regimes and principles and attendant legal issues which apply to the production, operation and distribution of online products and services # Have a developed capacity to analyse and apply a range of legal principles (especially contract, copyright, defamation, privacy, obscenity) which arise in relation to the production, commercialisation and financing of online products and services # Be well-placed to critically evaluate the impact of the law and various proposals for reform of the law # Have a nuanced appreciation of the difficult theoretical issues that the internet (especially) throws up
Assessment:	<p>Class participation, including a short in-class presentation on one of the seminar topics (10%) Take-home examination (90%) (26–29 July) or 8,000 word research paper (90%) (4 September) on a topic approved by the subject coordinator</p>
