Subject Overview:	This subject examines definitions and models of giftedness and talent, the learning and socio-emotional characteristics of gifted children and their educational needs. The implications of these for programs, provisions, means of identification and school curriculum are outlined issues both in Australia and internationally are reviewed. Students taking this subject have opportunities to interact with gifted children and their parents and teachers. This subject provides an introduction to the study of the education of gifted and talented children. It examines (1) definitions of gifted learning; (2) models for resolving giftedness and talent; (3) the learning characteristics of students identified as gifted (cognitive, metacognitive, affective and social) and developmental trends in these areas; (4) the types of knowledge that are likely to lead to gifted learning; (5) procedures for identifying gifted learners and their learning characteristics; (6) the influence of culture on gifted and talented learning (gifted indigenous learners, cross cultural gifted learning; (7) the implications for teaching, curriculum programming and school level organisation at curriculum provision.
Learning Outcomes:	On subject completion you should be able to: # critically analyse and evaluate contemporary theories of gifted and talented learning and development, # develop and implement relevant selection and assessment procedures that are supported by current research in gifted and talented learning, # comprehend, analyse and apply emotional and social influences on gifted and talented learning, # comprehend and use developmental trends (cognitive, metacognitive, affective and social) in the emergence of giftedness and talent.
Assessment:	A critical examination (review and analysis, approx 5,000 words) of an aspect in gifted and talented learning and its implications for identification.
