

FRST90017 Bushfire Planning & Management

Credit Points:	12.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	This subject is not offered in 2014. This subject is taught intensively, on campus, from 31 Marh to 11 April 2014. A major assignment will be due one month following the intensive teaching period.
Time Commitment:	Contact Hours: 24 hours lectures and 36 hours practical work delivered in one two-week intensive teaching block Total Time Commitment: 120 hours
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Description, Subject Objectives, Generic Skills and Assessment Requirements of this entry. The University is dedicated to provide support to those with special requirements. Further details on the disability support scheme can be found at the Disability Liaison Unit website: http://www.services.unimelb.edu.au/disability/
Contact:	Melbourne School of Land & Environment Student Centre Ground Floor, Melbourne School of Land & Environment (building 142) <i>Enquiries</i> Phone: 13 MELB (13 6352) Email: 13MELB@unimelb.edu.au (mailto:13MELB@unimelb.edu.au)
Subject Overview:	The course covers the fundamentals of setting and achieving bushfire management objectives for ecological and fire protection purposes in natural ecosystems. It covers the contents of a fire management plan, setting objectives, developing fire prescriptions, undertaking monitoring and evaluation of the management process, and review.
Learning Outcomes:	By the end of the subject students should: <ul style="list-style-type: none"> # Be able to set fire management objectives for individual burns and for broader management areas. # Be able to develop burning prescriptions to achieve fauna, flora, and protection objectives. # Be able to use a knowledge of plant and animal life history attributes to devise sustainable fire regimes. # Be able to devise fire management strategies and plans that maintain water quality and yield. # Be able to use GIS programs to develop fire management plans. # Be able to establish and run a monitoring program to assess the effectiveness of a fire management plan. # Be familiar with the use of Codes of Practice to achieve world best practice in fire management. # Be familiar with some key legal responsibilities related to fire management including the maintenance of biodiversity, protection from damaging fires and fire suppression.
Assessment:	Several small daily "quizzes" - 20%, Literature review assignment (2000 words) - 30%, Major assignment (3500 words) - 50%
Prescribed Texts:	None
