

MUSI30219 Music Performance Science

Credit Points:	12.50
Level:	3 (Undergraduate)
Dates & Locations:	This subject is not offered in 2014.
Time Commitment:	Contact Hours: One 2-hour seminar per week Total Time Commitment: 120 hours
Prerequisites:	At least 75 points of level 1 subjects; musical background equivalent to at least AMEB grade 6.
Corequisites:	N/A
Recommended Background Knowledge:	N/A
Non Allowed Subjects:	N/A
Core Participation Requirements:	It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability will impact on meeting the requirements of this course are encouraged to discuss this matter with a Faculty Student Adviser and the Disability Liaison Unit.

Subject Overview:	This subject addresses all levels of music performance science by critically examining psychological, sociological and scientific research related to performing and creating music. Attention is given to the sub-skills of music performance including processes involved when listening, sight-reading, practising, memorising, improvising and creating music, as well as structural communication, emotional communication, body movement, performance anxiety, and rehearsing and conducting with regard to various types of musical instruments and ensembles and in differing social contexts.
Learning Outcomes:	<p>On completion of this subject, students should be able to:</p> <ul style="list-style-type: none"> # Distinguish between the main strands of contemporary research in performance science; # Understand the contributions that psychologists, acousticians, physiologists and physicians are making on contemporary understandings of music performance and music creation; # Make critical judgments about psychological, sociological and scientific literature related to appreciating, performing and creating music; # Appraise literature related to how optimum performance can be enhanced through greater understanding of research and its applications to the performance and practice of music; and # Explore different approaches and consider theoretical and methodological issues relevant to designing and conducting research in music performance science.
Assessment:	Attendance and active participation at seminar discussions and workshops (10%); Formulation of research question/issue that includes 1,000 word contextual information on why the study would benefit knowledge in the area (20%, due week 4); Development of research proposal of 4,000 words that includes problem statement, contextual information, literature review, and proposed methodology (50%, due end of semester); One written test on content covered in lectures (20%, week 9).
Prescribed Texts:	None
