Subject Overview:	This subject focuses on more advanced external financial reporting obligations applicable to entities within the framework of the Australian reporting environment. In particular, it examines key technical Accounting Standards integral to the preparation of general purpose financial statements by reporting entities. It also considers the theories that help explain why financial accounting exists as well as what motivates and affects the judgements of managers when making financial accounting reporting decisions. Finally, it critically reviews important contemporary accounting issues affecting the business community under consideration by accounting standard setters.									
Learning Outcomes:	<ul style="list-style-type: none"># Identify and explain the theories that explain why financial accounting exists and the accounting choices made by managers# Record and disclose transactions and events applying the provisions of key Accounting Standards# Critically evaluate how well these standards appropriately incorporate the principles as outlined in the Conceptual Framework									

	<ul style="list-style-type: none"> # Identify and explain contemporary financial accounting reporting issues affecting the business community and being considered by standard setters # Identify and explain financial reporting disclosure and presentation issues as part of an annual report # Explain the implications for financial reporting arising from alternative accounting policy choice decisions faced by management
Assessment:	A 3-hour end-of-semester examination (70%), a one-hour mid-semester test (20%) and tutorial assessment (10%). Successful completion of this subject requires a 50% pass in the end-of-semester examination.
