Subject Overview:	In this subject students will apply theoretical principles in Applied Pathophysiology and Emergency Nursing 1 and 2 to support comprehensive patient assessment, monitoring and care planning in specialty nursing practice. Students will learn to incorporate knowledge and evidence of psycho-social factors influencing patient outcomes to inform their clinical decision making in practice.
Learning Outcomes:	Students will engage in field practice and demonstrate competency in the specialty through the : 1. Integration of core principles covered in the subject and its pre-requisite, Applied Pathophysiology, to develop practice knowledge that supports comprehensive patient assessment and monitoring; 2. application of knowledge and skills to recognise, prioritise and respond to patients experiencing acute alterations to health status; 3. evaluation of the effect of nursing interventions in the delivery of safe competent nursing care; 4. application of skills in problem-solving, critical thinking, reflective practice and self-directed learning to the delivery of specialist nursing care.
Assessment:	Written assignment (2500 words- patient assessment, problem identification, and care plan) - 50% Written assignment (2500 words- reflective practice)- 50% 8 Clinical Skills Assessments (hurdle)
Prescribed Texts:	None

Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
