Coordinator:	Dr Simon Cropper
Contact:	Melbourne School of Psychological Sciences 12th floor Redmond Barry Building (Building 115 Map) Telephone: + 61 3 8344 6377 Email: graddip-psych@unimelb.edu.au Web: http://www.psych.unimelb.edu.au/study/subjects/mind-brain-and-behaviour-1
Subject Overview:	<p>Mind, Brain and Behaviour 1 focuses on the workings of the individual from a psychological perspective. It includes detail of the neural components constituting the brain, the operation of the sensory systems underlying interaction with the external environment and the cognitive processes that construct the internal world experienced by the individual. Careful consideration will be given to the nature of this internal world and the importance of its relationship to the external world.</p> <p>The course is designed to raise significant questions prompting students to think about behaviour and to explore possible answers. Students will be introduced to the tools used in psychology to find answers to these questions. A common research-centred framework is adopted and the statistical tools that support this framework are introduced and developed as an integral part of the course. Psychology derives its approaches and questions from both science and the arts.</p>
Learning Outcomes:	<ul style="list-style-type: none"> # To introduce the broad areas and varied approaches that comprise the field of psychology; # To develop an understanding of some key psychological concepts and theories from several areas of psychology; # To develop skills in the use and evaluation of scientific methodology and enquiry, including research design and data analysis; # to develop basic skills in the critical evaluation of psychological literature;
