Corequisites:	None								
Recommended Background Knowledge:	None								
Non Allowed Subjects:	None								
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Students Experiencing Academic Disadvantage Policy, academic requirements for this subject are articulated in the Subject Overview, Objectives, Assessment and Generic Skills sections of this entry. It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability will impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and the Disability Liaison Unit: http://www.services.unimelb.edu.au/disability/								
Coordinator:	Mr Brett Tennent-Brown								
Contact:	Email: brett.tennent@unimelb.edu.au (mailto:brett.tennent@unimelb.edu.au)								
Subject Overview:	This subject is designed for veterinary graduates with postgraduate clinical experience who wish to acquire advanced clinical training. Practical work is an integral part of the programs offered. Students undertake discipline-based clinical placements, which may include participating in ward rounds, unit meetings and outpatient clinics. This is a flexible subject designed to meet the individual discipline requirements of different clinical specialties.								
Learning Outcomes:	Students will acquire problem solving skills through both mentored and self-directed clinical learning during clinical placements.								
Assessment:	Satisfactory completion of clinical work (20%) Continual assessment by supervisors on a case-by-case basis, providing written feedback twice in each semester. Written Assignment (60%) Dependent on discipline For students undertaking a residency within the Veterinary Hospital: A major written assignment per year prepared as a paper ready for submission to a peer reviewed journal, e.g. as a clinical research report, case report, case series (prospective or retrospective), topic update, etc. The report should be prepared according to the guidelines of the Journal of Veterinary Internal Medicine or agreed alternative. The length of the written assignment is likely to vary according to journal guidelines. There is an expectation that the article will be published as part of preparations for the student's specialty board qualification. For students undertaking a Dairy Residency program: Up to three written reports (maximum 500 words each) per semester (up to 6 reports per year: 25% total) plus either an examinable online module in Veterinary								

	Public Health or a written assignment, maximum 3000 words) (one per year: 35% total). Oral Presentation (20%) Up to three oral presentations (up to 60 minutes each) per year. Hurdle requirement Minimum of 80% attendance at clinical training sessions (e.g. clinical placements, ward rounds, unit meetings and outpatient clinics, clinical consultancies)
Prescribed Texts:	Students will review case studies and scholarly journal articles with an eye toward critical analysis, and engage in discussion in small groups.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Students will develop advanced clinical skills through animal model and case-based teaching.
