BIOL90019 BioSciences Research Project Part 4

Credit Points:	50			
Level:	9 (Graduate/Postgraduate)			
Dates & Locations:	2016, Parkville This subject commences in the following study period/s: Semester 1, Parkville - Taught on campus. Semester 2, Parkville - Taught on campus.			
Time Commitment:	Contact Hours: Distribution of time between specific tasks will be decided in negotiation with the supervisor, but an overall weekly commitment of 10 hours per week (per 12.5 point loading) is expected. Total Time Commitment: This subject is an individual research project and weekly contact hours will vary depending on the nature of the project. Students should discuss this with their supervisor but as a guide, a student enrolled in and a 50 point research project subject would be expected to be engaged in their research for an average of 40 hours per week			
Prerequisites:	One of:			
	Subject	Study Period Commencement:	Credit Points:	
	BIOL90012 BioSciences Research Project C	Semester 1, Semester 2	12.5	
	BIOL90013 BioSciences Research Project C	Semester 1, Semester 2	25	
	BIOL90014 BioSciences Research Project C	Semester 1, Semester 2	37.5	
	BIOL90015 BioSciences Research Project C	Semester 1, Semester 2	50	
Corequisites:	None			
Recommended Background Knowledge:	None			
Non Allowed Subjects:	None			
Core Participation Requirements:	For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http:// services.unimelb.edu.au/disability			
Coordinator:	Dr John Golz

Subject Overview:	This subject is part of a sequence of four (A to D) taken in successive semesters that together constitute the 125-point research project offered through the MSc Bioscience. The project involves laboratory or field-based experimental research in an area of Ecology and Evolutionary Biology, Genetics, Genomics and Developmental Biology, and Plant Biology. The research projects cover a broad range of research from molecular to population and evolutionary biology in micro-organisms, insects, plants and animals. The project will be based in the laboratory of an academic staff member in the School of BioSciences or an approved external supervisor, depending on the particular research project. The research project aims to develop a range of experimental and technical skills, a capacity to set goals and to design and plan experiments. Apart from the help and guidance from their supervisor(s) each student also has a committee, which provides additional help and expertise. This committee is responsible for assessment of			

Bit and the way in which experiments are designed, communicated and interpreted; # understand the way in which experiments are designed, communicated and interpreted; # extend their abilities in oral and written scientific communication; # gain the ability to read and assimilate specific research papers and to understand how the research reported relates to the broad field of biological sciences; # acquire experience in planning and executing laboratory or field-based experimental research; # develop effective skills in data collection and analysis, and postulating testable hypotheses based on this data. The subject involves experimental research under the direction of a supervisor. Assessment: The entire research project for the Master of Science (BioScience) consists of 125 points with assessments distributed over 4 semesters. Assessments in BioScience Research project D contribute 80% to the final mark of the research project. A 20 minute oral presentation due at the end of semester (12.5% and 70% of final mark). A research thesis of up to 20,000 words due at the end of semester (12.5% and 70% of final mark). Prescribed Texts: None Breadth Options: This subject is not available as a breadth subject. Fees Information: Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees Generic Skills: This subject should provide students with the opportunity to develop the following generic skills: # the ability to evaluate scientific literature; # the ability to conduct res			
semester of entry (semesters 1 or 2) and continue for up to 88 weeks (21 weeks per semester over the four semester). For how long and at what time within the enrolment the actual period of leave is to be taken needs to be negotiated with a student's supervisor. The Research Project will be due for submission by the end of the formal examination period of the fourth semester of enrolment if an earlier date is not specified. Learning Outcomes: Objectives of this subject are for students to: # understand the way in which experiments are designed, communicated and interpreted; # extend their abilities in oral and written scientific communication: # gain the ability to read and assimilate specific research papers and to understand how the research reported relates to the broad field of biological sciences; # acquire experience in planning and executing laboratory or field-based experimental research; # develop effective skills in data collection and analysis, and postulating testable hypotheses based on this data. Assessment: Assessment: The entire research project for the Master of Science (BioScience) consists of 125 points with ans to the research project. A 20 minute oral presentation due at the end of semester (12.5% and 10% of final mark). A research thesis of up to 20,000 words due at the end of semester (12.5% and 10% of final mark). Prescribed Texts: None Breadth Options: This subject is not available as a breadth subject. Fees Information: Subject EFTSL, Level, Discipline & Census Date, http
