Subject Overview:	This subject is a capstone, bringing an integrative view of supply chain management and business competitiveness. Via primarily case studies, it will develop and illustrate key strategic supply chain concepts, such as design, operation and improvement strategies of supply chains. International case studies will be used to create a world view of best practices in SCM. This includes management of risk, prices, costs and service levels in SCM. Organisational structures needed to deliver supply chain strategy and governance, control and reporting systems will be emphasised.
Learning Outcomes:	At the completion of the subject, students should have the: <ul style="list-style-type: none"> • Understanding of practical supply chain strategic decisions • Knowledge of key frameworks for supply chain design and operation • Understanding of the operational and business performance outcomes of SCM strategies • Ability to undertake supply chain strategic analysis of cost, quality and delivery reliability • Knowledge of risk and its management in supply chains • Ability to match performance criteria to SCM design decisions
Assessment:	Take-home exam (1000 words equivalent), due Tuesday after course delivery (20%) Assignment (1500 words), due four weeks after course delivery (30%) Field project (3000 words), due eight weeks after course delivery (50%)
Prescribed Texts:	nil
Recommended Texts:	Nil
