Subject Overview:	This research-focussed subject will draw together, and enable students to apply, the knowledge and skills they have acquired in the Master of Supply Chain Management program. They will undertake a practical investigation of a supply chain challenge/issue and develop a plan for how to solve it. Within a specific supply chain domain to be chosen by the student and agreed by the subject coordinator, this subject will require investigation of all major aspects of the supply chain. It will typically involve a feasibility study or business plan for a supply chain improvement, design or change.
Learning Outcomes:	<p>On successful completion of this subject, students should be able to:</p> <ul style="list-style-type: none"> # Create and refine a research issue and practical value creation question; # Examine the issue from all angles in order to evaluate its potential; # Apply knowledge of supply chain management; # Evaluate supply chain strategies; # Develop supply chain capabilities and improvements within organisations.
Assessment:	15 minute in class proposal presentation and 500 word written project proposal (due 1 week after first round of classes (20%) 4,000 word individual project report due 2 weeks after final round of classes (60%) 15 minute presentation of investigation methods and findings (10 minute presentation and 5 minute Q and A) due during final round of classes (20%)
Prescribed Texts:	You will be advised of prescribed texts by your lecturer.

Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
