The conditions in which people are born, grow, live, work and age shape their health as does the distribution of money, power and resources at global, national and local levels. This subject will provide an overview of the Australian and international evidence on the ways in which social, economic and cultural processes contribute to population health. More specifically, the subject will examine relationships between health and a range of determinants of health (such as gender, poverty, socio-economic position, housing, employmen and working conditions, race/ethnicity, discrimination and place), the ways in which health inequalities are generated and how health interventions might influence population health.
At the completion of this subject, students should be able to demonstrate the ability to:
$_{\#}$ Assess the key social and economic determinants of health
 # Assess the key social and economic determinants of health # Analyse the ways in which the multiple social and economic determinants intersect to shape health # Describe models of the social determinants of health

	# Critically analyse the relationship between health and gender, poverty, socio-economic position, employment and working conditions, race/ethnicity, discrimination and place
Assessment:	One 15-minute presentation per student during semester (10%) One 1,500-word report based on the presentation and due after the presentation (30%) One 2,500-word essay due at ten end of the University's examination period (60%)
Prescribed Texts:	Selected readings will be available.
Recommended Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	Upon completion of this subject a student should be able to: # Critically analyse relevant empirical studies and conceptual literature. # Demonstrate advanced written and oral communication skills # Demonstrate advanced skills in critical reading.
