

220-417 Forest Health

Credit Points:	12.500
Level:	Graduate/Postgraduate
Dates & Locations:	2008, This subject commences in the following study period/s: Semester 1, - Taught on campus. Regular teaching mode at the Burnley Campus
Time Commitment:	Contact Hours: 60 hours Total Time Commitment: 60 contact hours and approximately 60 non-contact hours
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	Internet and email access
Coordinator:	Mr N Collett & Mr I Smith
Subject Overview:	<p>This subject covers the ecology, impact and management of insect pests and pathogens in forests, woodlands, plantations and urban environments. An understanding of the dynamics of pest and pathogen populations is essential in order to determine the risk they pose and to determine appropriate management actions. The increasing globalisation of trade also requires a thorough understanding of biosecurity protocols for the protection of trees in the landscape from exotic incursions and for maintaining overseas access for timber-based products.</p> <p>At the completion of this subject, participants should be able to:</p> <p>Define and recognise major insect pests and</p> <ul style="list-style-type: none"> # pathogens within forests, woodlands, plantations and the urban environment; # Recognise and distinguish factors that predispose forests and plantations to insect pest and disease outbreaks; # Propose and develop models to predict economic impacts of outbreaks; # Design strategies to prevent and manage outbreaks; # Design and evaluate forest health surveillance programs that monitor pest levels and meet certification standards; # Recognise and understand biodiversity issues in relation to overall pest management issues; <p>Recognise the fundamentals of national and international forest health biosecurity framework and the importance of quarantine to trade for maintaining market access for forest products.</p>
Assessment:	Two assignments based on field/practical studies (2500 words each, 50%) and one three-hour examination (50%).
