Coordinator:	Lawrie Drysdale and David Gurr
Subject Overview:	<p>The subject investigates conceptual frameworks that inform educational leadership including: Sergiovanni's five school leadership forces; Bolman and Deal's leadership frames; Robbins' organisational behaviour model, Drysdale, Gurr and Mulford's school leadership framework. The subject uses the broad economic, social and educational contexts for schools and education systems and sub-systems to develop a case for particular challenges for, and approaches to, school leadership. The subject supports participants to examine key national and international research and empirical data on social and economic developments, patterns of education participation and outcomes, public expectations and policy directions to identify the key challenges for school and system leadership. Upon the basis of these challenges, and supported by the most recent research, different approaches to school leadership are interrogated. Through these processes, key principles and approaches to school leadership are identified. Students construct a case study that is explored in depth through a group facilitation process that forms the basis for an informed analysis of the case study.</p>
Assessment:	A case study report of 8, 000 words, or equivalent (100%)
Prescribed Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
