Coordinator:	Centre for Health & Society
Subject Overview:	<p>This subject will provide students with the knowledge and analytical frameworks about the social dynamics of those institutions and structures that constitute Australian health systems. The subject will enhance students' ability to undertake critical policy analysis. Issues that will be addressed will include, but may not be exclusive to: the theoretical and institutional context of health policy and public policy; Federalism and intergovernmental relations in health; health financing systems; health workforce supply and policy; policy making structures and processes in health; critical themes in contemporary policy including population health policy, Indigenous health policy, primary health care policy, research, health information systems, complementary health systems and evidence based policy. Upon completion of the subject, students should be able to apply the critical analysis of health policy to health policy development and evaluation.</p> <p>Subject Objectives:</p> <ul style="list-style-type: none"> • To be able to describe and analyse the institutions, structures and processes that constitute Australian health systems • To have developed a basic understanding of the social dynamics of Australian health systems • To have a basic awareness of tensions in health policy from different institutional and professional perspectives; • To be able to compare and contrast differing interests and perspectives on health policy
Assessment:	Critical analysis of set readings and policy documents (plus other relevant readings) totalling 1,500 words, due mid semester (40%). Essay of approximately 2,500 words due at end of semester (60%).
Prescribed Texts:	Duckett, S. (2004) (2nd Ed) The Australian Health Care System, Melbourne: Oxford University Press.
Recommended Texts:	A set of additional readings will also be available for purchase.

Breadth Options:	This subject is not available as a breadth subject.
