Coordinator:	Centre for the Study of Health & Society
Subject Overview:	This subject provides an introduction to critical medical anthropology, a rapidly growing and dynamic endeavour, which provides a link between social anthropology and biological anthropology. While the subject discusses various perspectives in medical anthropology, it focuses on critical medical anthropology which draws upon the interdisciplinary literature on political economy of health and world systems theory. The subject addresses topics such as health and the environment from foraging societies to the capitalist world system; the social origins of disease and suffering; medical systems in indigenous and pre-capitalist state societies; biomedicine; medical pluralism; health issues among Australian aborigines, the Maori, and peoples of Papua New Guinea; the anthropology of the body; and the struggle to create a healthy planet.
Assessment:	Masters (500 Level) Assessment is in the form of a mid-semester 2000-word essay (40%) and a final 2500-word end of semester essay (50%) and two 250 word abstracts on selected readings to be discussed in class, to be submitted during the semester (2x5%).
Prescribed Texts:	None
Recommended Texts:	A set of readings will be available for purchase.
Breadth Options:	This subject is not available as a breadth subject.
