<b>Coordinator:</b>	Prof Janet McCalman
<b>Subject Overview:</b>	This subject is a history of medicine from prehistory to the present, with a special emphasis on the past three hundred years. It explores the experience and understanding of disease and its therapies in different cultural settings, and the transformation in those understandings since the scientific revolution - from the magical to the molecular. It includes ancient medicine, the evolution of the hospital, the contest between lay and professional practitioners, dissection and the birth of the clinic, the discovery of the germ and the rise of the laboratory. What is the patient's story? How has medicine changed our experience and management of sickness, trauma, sexuality and difference? What do we mean by 'medicalisation' and how has it changed private life? Students who complete this subject should develop the ability to analyse the role of medicine and its practitioners in the shaping of private experience, public welfare, suffering and mortality.
<b>Assessment:</b>	Three 500-word position papers 30% (to be submitted in the relevant class), a 2500 word research essay 60% (due after the teaching period) and 10% for class participation. A hurdle requirement of 80% attendance at tutorials.
<b>Prescribed Texts:</b>	Prescribed Texts:Blood & Guts: A Short History of Medicine (Roy Porter), 2003
<b>Breadth Options:</b>	This subject is a level 2 or level 3 subject and is not available to new generation degree students as a breadth option in 2008. This subject or an equivalent will be available as breadth in the future. Breadth subjects are currently being developed and these existing subject details can be used as guide to the type of options that might be available. 2009 subjects to be offered as breadth will be finalised before re-enrolment for 2009 starts in early October.
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
