

## 725-AA Master of Earth Science

<b>Year and Campus:</b>	2008
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
<b>Level:</b>	Graduate/Postgraduate
<b>Duration &amp; Credit Points:</b>	
<b>Contact:</b>	<p>Faculty of Science The University of Melbourne</p> <p>Tel: + 61 3 8344 6404 Fax: +61 3 8344 5803 Web: <a href="http://www.science.unimelb.edu">www.science.unimelb.edu</a> (<a href="http://www.science.unimelb.edu.au/ask/">http://www.science.unimelb.edu.au/ask/</a>)</p>
<b>Course Overview:</b>	<p>In an increasingly globalised world, demanding ever more expertise, the Master of Earth Science provides high-quality training in line with trends in both Europe and North America. The program includes intensive one to two week-long theory and field-based units which have been taught for the last fourteen years by senior staff in the School of Earth Sciences. These have been formally evaluated by students, industry and government attendees to ensure their relevance and quality.</p> <p>The School of Earth Sciences is a highly dynamic and innovative department, with an extremely strong research profile and excellent links with industry. The School houses the headquarters of both the Minerals Tertiary Education Council (MTEC) and the Predictive Mineral Discovery Cooperative Research Centre (PMDCRC). These connections with MTEC and PMDCRC will continue to guide the development of Masters-level study to provide the necessary professional qualification for graduates wishing to work in industry. In particular, MTEC will be involved in delivering new Masters-level subjects in ore deposits and geodynamics.</p>
<b>Objectives:</b>	<p>The objective of the Master of Earth Science is to provide advanced training in three streams of the Earth Sciences to candidates from Australia and overseas. On completion of their studies, students will have been given opportunities to:</p> <ul style="list-style-type: none"> <li># increase their knowledge and understanding of the relevant discipline and awareness of current developments and issues relating to this discipline;</li> <li># develop independent and critical thinking;</li> <li># improve oral and written communication skills;</li> <li># acquire advanced research skills and techniques (for example, laboratory techniques and data collection and analysis);</li> <li># engage in independent research, under appropriate supervision;</li> <li># present their research findings in documented scholarly form; and</li> <li># interact with many Australian and overseas students studying the same subjects.</li> </ul>
<b>Course Structure &amp; Available Subjects:</b>	<p>Three streams are available in the coursework component of the program, based on the combination of subjects selected as indicated below:</p> <p>Stream 1: Geodynamics &amp; Petroleum</p> <ul style="list-style-type: none"> <li># Basin Analysis and Structure</li> <li># Petroleum &amp; Energy Resources</li> </ul> <p>Plus one of:</p> <ul style="list-style-type: none"> <li># Geodynamics</li> <li># Geophysics &amp; 3D modelling</li> </ul> <p>Stream 2: Geodynamics &amp; Ore Deposits</p> <ul style="list-style-type: none"> <li># Economic Geology</li> <li># Geophysics &amp; 3D modelling</li> </ul> <p>Plus one of:</p> <ul style="list-style-type: none"> <li># Basin Analysis &amp; Structure</li> <li># Geodynamics</li> </ul>

	<p>Stream 3: Earth Systems</p> <ul style="list-style-type: none"> <li># Environment &amp; Earth Systems</li> </ul> <p>Plus a choice of two of:</p> <ul style="list-style-type: none"> <li># Geophysics and 3D modelling</li> <li># Basin Analysis &amp; Structure*</li> <li># Geodynamics *</li> <li># Petroleum &amp; Energy Resources</li> <li># Economic Geology</li> </ul> <p>* Most common choices</p> <p>To assist students in planning and completing the program, the Master of Earth Science Advisory Panel will provide:</p> <ul style="list-style-type: none"> <li># individual course advice to candidates concerning the subjects to be taken within their stream; and</li> <li># advice on preparing their literature review and choosing a minor thesis topic and supervisor.</li> </ul>
<b>Entry Requirements:</b>	an undergraduate degree in a relevant discipline, with an average across third year subjects of H2B (70%), or equivalent.
<b>Core Participation Requirements:</b>	<p>&lt;p&gt;For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.&lt;/p&gt; &lt;p&gt;It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: &lt;a href="http://services.unimelb.edu.au/disability"&gt;http://services.unimelb.edu.au/disability&lt;/a&gt;&lt;/p&gt;</p>
