Overview:	<p>Urban Design and Planning is founded upon the social, environmental, political, aesthetic and economic importance of design in the public realm, serving the public interest. It focuses on the intersections between architecture, landscape architecture, planning and geography. Students who have a desire to learn about and engage in the design of urban features will explore two strongly related fields of environmental practice: urban design as the shaping of urban space and urban planning as the strategic and regulatory mediation of urban change.</p> <p>Careers and Further Study</p> <p>Completion of the Urban Design and Planning major will provide a basis from which to gain professional practice in the field and to apply for the two-year program in the master of Urban Planning and Master of Urban Design, or for the three-year Masters programs in Architecture and Landscape Architecture. For more information on the Masters programs, please visit the Melbourne School of Design web site: www.abp.unimelb.edu.au/graduate-school (http://www.abp.unimelb.edu.au/graduate-school)</p>																												
Objectives:	<p>By the end of a three year Bachelor of Environments degree with a Urban Design and Planning major, students will have developed a strong base of design competence and knowledge across a wide range of Urban design and planning issues. For more information visit: www.benvs.unimelb.edu.au (http://www.benvs.unimelb.edu.au)</p>
