Subject Overview:	This subject will examine a range of theoretical models of second language acquisition, including Universal Grammar, interlanguage, the input hypothesis, and the interaction hypothesis. Individual factors including age, aptitude, motivation and individual learner strategies will also be considered. The contribution of applied linguistics to the field of second language teaching will be examined; in particular, the evolution of different approaches to language instruction over the past 50 years, and recent developments in teaching methodology and the place of grammar teaching. Students will write about their own language learning experiences and observe language teaching in action, applying their knowledge of language acquisition theory to these observations.
Objectives:	
Assessment:	Written work totalling 4000 words comprising an 800-word assignment 20% (due in week 6), a 1600-word assignment 40% (due in week 10), and a 1600-word assignment 40% (due at the end of the semester).
