<b>Subject Overview:</b>	By engaging them in practical classroom tasks, the subject introduces students to the pedagogical and technological issues involved in effective design, development and delivery of computer-assisted language learning (CALL) materials. The subject investigates selected CALL approaches (e.g., sociocollaborative, exploratory, tutorial) in relation to language teaching methodology, second language acquisition theory and technological development. The subject's particular emphasis is on the use of Internet-based resources. On completion of the subject, students should have a solid understanding of the impact of modern digital technology on second language learning and teaching, the development of digital materials and management of CALL in blended environments and in distance mode.
<b>Objectives:</b>	<ul style="list-style-type: none"> <li># have a solid background in the theory and practice of CALL;</li> <li># have a sound grasp of the technical issues involved in effective development and delivery of CALL material;</li> <li># be able to use a range of CALL materials and tools, particularly those Internet-based ones.</li> </ul>
<b>Assessment:</b>	An essay of 4000 words on a chosen CALL topic 70%. A student journal being a record of reflections on the subject and on the resources they find on the Internet, submitted electronically and totalling 1000 words 30%. Both pieces of assessment are due at the end of semester.
