Coordinator:	Dr Sally Michelle Stewart-Wade
Subject Overview:	The subject allows you to conduct an original research project, under supervision to be approved by a subject Coordinator. The work will be equivalent to lecture and practical based subjects worth 50 points. The content and extent of the project will be determined by a Coordinator, in collaboration with the student and the designated supervisor. The work would ordinarily include a review of a body of scientific literature, together with a critical evaluation of research or experimental protocols, and the development of research methods, implementation of a mathematical model, completion of an original experiment, or a thorough exploration of a scientific issue. Projects would ordinarily include a component of original research well beyond a review or critique. Projects may involve regular one-hour discussion groups where students report on progress, major problems and plans.
Assessment:	A written report, in the form of a scientific paper, based on the student's original work, to be assessed by at least two people of the supervisors choice. A subject worth 50 points should result in a report of about 10000 words and no more than 12000. Other parts of the assessment may include a spoken presentation, a research proposal, time schedule, attendance at seminars and workshops.
Prescribed Texts:	None
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
