Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability</p></p>
Subject Overview:	<p>In this subject, students examine and appreciate the various tools, methodologies and information technology concepts that a forensic analyst is required to use when undertaking a complex and detailed forensic examination. The emphasis is on acquiring and examining data that is an asset to an investigation, and how to present that information in a report. It covers the identification of information that is relevant to an investigation, advanced data asset acquisition, its various approaches and how it can be used to secure evidence for later examination. Primarily, the subject offers students:-</p> <ul style="list-style-type: none"> # An understanding of the various methodologies for identifying and acquiring assets; # The ability to adapt to numerous tools and techniques for extracting key data from evidence in an investigation; and # The knowledge and skills to write a report detailing the important facets of an investigation based on the facts of the analysis
