

510-625 Project in Biomedical & Health Sciences

Credit Points:	37.50
Level:	9 (Graduate/Postgraduate)
Dates & Locations:	2009, This subject commences in the following study period/s: Semester 1, - Taught on campus. Semester 2, - Taught on campus.
Time Commitment:	Contact Hours: Distribution of time between specific tasks will be decided in negotiation with the supervisor, but an overall commitment of 10 hours per week (per 12.5 point loading) is expected. Total Time Commitment: Not available
Prerequisites:	Students must satisfy the requirements for entry into the MSc program.
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	None
Core Participation Requirements:	It is University policy to take all reasonable steps to minimise the impact of disability upon academic study and reasonable steps will be made to enhance a student's participation in the University's programs. This subject requires all students to actively and safely participate in laboratory activities. Students who feel their disability may impact upon their participation are encouraged to discuss this with the subject coordinator and the Disability Liaison Unit.
Coordinator:	Prof Doris Young
Subject Overview:	<p>This subject provides students with the opportunity to design and conduct, under supervision, independent research in biomedical and health sciences. Specific research projects will depend upon the availability of appropriate expertise and resources. Students will take responsibility for a research project, including the design of field and/or laboratory experiments; collection, appropriate statistical analysis, and interpretation of data; and oral and written presentations of the results. The report describing the research will more closely resemble a scientific paper than a traditional thesis. Students will assimilate and critically evaluate new knowledge within a scientific paradigm and communicate that knowledge to others. Students will also develop skills in managing a scientific research project, writing scientific reports, providing and responding to peer reviews, and making an oral presentation.</p> <p>Subject to supervisor approval, students may enrol in a combination of research project subjects as indicated below over their two years of full-time study or four years of part-time study, to ensure they have completed a total of 75 points for the minor research project by the end of their course.</p> <p>75 point Minor Research Project:</p> <ul style="list-style-type: none"> # 510-627 Project in Biomedical & Health Sciences Minor – 12.5 points # 510-626 Project in Biomedical & Health Sciences Minor – 25.0 points # 510-625 Project in Biomedical & Health Sciences Minor – 37.5 points # 510-624 Project in Biomedical & Health Sciences Minor – 50 points
Objectives:	<p>The objectives of this subject are to provide students with skills in:</p> <ul style="list-style-type: none"> • conducting research in biomedical and health sciences; • designing experiments; • taking responsibility for managing a research project; • preparing and giving an oral and written presentation of the results; • expressing intellectual, scientific arguments; • assimilating and critically evaluating existing knowledge within a scientific paradigm; and

	<ul style="list-style-type: none"> • developing a justified budget for their proposed research.
Assessment:	The assessment requirements below are applicable to the entire 75 point Research Project. A literature review of 4,000 words, due toward the end of the first semester of this subject (10%); a grant proposal/project brief of 1,000 words, due in the early part of the second semester of this subject (5%); a final 20 minute oral presentation (5%), due towards the end of the final semester of this subject; and a major research report of 8,000 words, due towards the end of the final semester of this subject (80%).
Prescribed Texts:	None.
Recommended Texts:	None.
Breadth Options:	This subject is not available as a breadth subject.
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>At the completion of this subject, students should gain skills in:</p> <ul style="list-style-type: none"> • articulating the breadth of knowledge gained in a particular discipline; • critical appraisal of draft documents; • developing the ability to exercise critical judgement; • expressing persuasive intellectual arguments; • high level written report presentations; • managing a research project; • oral communication and presentation; • rigorous and independent thinking; and • time management and self-management skills.
Related Majors/Minors/Specialisations:	R05 RH Master of Science - Biomedical and Health Sciences
