

## 680-AF Bachelor of Engineering (Engineering Management) Mechanical & Manufacturing

<b>Year and Campus:</b>	2009
<b>Fees Information:</b>	Subject EFTSL, Level, Discipline & Census Date, <a href="http://enrolment.unimelb.edu.au/fees">http://enrolment.unimelb.edu.au/fees</a>
<b>Level:</b>	Undergraduate
<b>Duration &amp; Credit Points:</b>	
<b>Contact:</b>	<p>Engineering Student Centre Ground Floor, Old Engineering Building The University of Melbourne Victoria 3010 AUSTRALIA Tel: +61 3 8344 6703 Fax: +61 3 9349 2182 Email <a href="http://eng-unimelb.custhelp.com">http://eng-unimelb.custhelp.com</a> (Engineering%20Student%20Centre%20%20Ground%20Floor,%20Old%20Engineering%20Building%20The%20University%20of%20Melbourne%20Victoria%203010%20AUSTRALIA%20%20Tel:%20+61%203%208344%206703%20Fax:%20+61%203%209349%202182%20%20Email%20http://eng-unimelb.custhelp.com)</p>
<b>Course Overview:</b>	<p>The department was first established after the Second World War, although the course in mechanical engineering began in 1907 as a Faculty stream. An industrial engineering degree was added in the late 1950s. In 1988 an extensive review of the curriculum led to the undergraduate courses being restructured into a new, single degree course in mechanical and manufacturing engineering with students having the option to choose specialisations in their last year. A 1995 review of the department by a team from the US and UK ranked its research and teaching at the highest international standards. In 1996, the five-year combined degree in mechatronics commenced. Mechanical and manufacturing engineering applies human and material resources to the design, construction, operation and maintenance of machines (supported increasingly by sophisticated computer technology) to move people, goods and materials; generate energy; produce goods and services; and control pollution and dispose of wastes. It interacts with all other branches of engineering including the medical sciences.</p> <p>First-year students acquire a training in mathematics, an introduction to engineering and foundations in economics and management.</p> <p>Second-year students continue with mathematics and are introduced to engineering design plus basic mechanical engineering sciences (thermodynamics, fluid mechanics, mechanics and machine dynamics), materials and electro-mechanical system modelling.</p> <p>Third year students continue engineering science, engineering design and manufacturing studies.</p> <p>Fourth year includes a major project and electives in commerce and advanced engineering; in bioengineering, applied mechanics, fluids, energy, mechatronics and management. Students planning to enter industry directly after graduating can choose how best to prepare for their careers, bearing in mind that many design and research engineers move into management. Many students participate in industry challenges such as the Formula SAE-A competition, or other build and demonstrate projects that are world competitive.</p> <p>In laboratory, research and design work students have access to specialised facilities for materials testing, wind tunnels, engine test cells and a heavy engineering workshop for the manufacture of testing facilities and experimental equipment.</p> <p>Engineering design, which draws on the Faculty's extensive computer facilities and computational mechanics, is now established as an area of study and research in conjunction with computer science.</p> <p>Graduate research programs are available in aspects of mechanical, mechatronics, manufacturing and bioengineering. The department is internationally regarded in fluid mechanics, advanced automotive engineering technology, machine dynamics, mechatronics and biomedical engineering.</p>
<b>Objectives:</b>	-
<b>Course Structure &amp; Available Subjects:</b>	The recommended or standard course structure for the Mechanical stream of the Bachelor of Engineering (Engineering Management) are listed below. When setting the timetable every

effort will be made to avoid clashes between the times of classes associated with these sets of subjects. Students should be aware however, that if it proves to be impossible to achieve a timetable without clashes in these sets of subjects, the Faculty reserves the right to modify course structures in order to eliminate the conflicts. Students will be advised during the enrolment period of the semester if the recommended courses need to be varied. Where the courses include elective subjects these should be chosen so that timetable clashes are avoided. In particular, students in combined degrees should plan their courses so that the subjects chosen in the other faculty do not clash with those recommended for the engineering component.

**Subject Options:**

THERE WILL BE NO FIRST YEAR ENTRY INTO THIS COURSE FROM 2008.

**Third Year**

Subjects listed below **MUST** be taken in this approved order, regardless of semester availability.

**Semester 1**

Subject	Study Period Commencement:	Credit Points:
436-284 Organisational Engineering	Semester 1	12.500
436-351 Thermofluids 2	Semester 1	12.500
436-353 Mechanics 2	Semester 1	12.500
436-384 Engineering Design & Processes 1	Semester 1	12.500

**Semester 2**

Subject	Study Period Commencement:	Credit Points:
436-311 Engineering Design & Processes 2	Semester 2	12.500
436-352 Thermofluids 3	Semester 2	12.500
436-354 Mechanics 3	Semester 2	12.500

Commerce subject (12.5 points) - *must be a level-200 or level-300 and the pre-requisites met where necessary.*

**Fourth Year**

Subjects listed below **MUST** be taken in this approved order, regardless of semester availability.

**Year Long**

Subject	Study Period Commencement:	Credit Points:
436-492 Major Project and Professional Practice	Year Long	25.000

**Semester 1**

Subject	Study Period Commencement:	Credit Points:
436-431 Mechanics 4	Semester 1	12.500
436-432 Thermofluids 4	Semester 1	12.500
436-382 Control Systems 1	Semester 1	12.500

**Semester 2**

Subject	Study Period Commencement:	Credit Points:
436-415 Quality Engineering	Semester 2	12.500

Elective (12.5 points) - *must be an approved final year Mechanical Engineering elective.*

Commerce Subject (12.5 points) - *must be a level-200 or level-300 and the pre-requisites met where necessary.*

### **Mechanical electives**

Subject	Study Period Commencement:	Credit Points:
436-386 Biomaterials	Semester 1	12.500
436-387 Cellular & Tissue Biomechanics	Semester 2	12.500
436-388 Introduction to Biomechanics	Semester 1	12.500
436-414 Optimisation	Semester 2	12.500
436-419 Computational Biomechanics	Semester 2	12.500
436-421 Power Generation Systems	Not offered 2009	12.500
436-436 Advanced Computational Mechanics	Semester 2	12.500
436-460 Advanced Engineering Materials	Semester 2	12.500
436-465 Advanced Fluid Mechanics	Semester 2	12.500

#### **Core Participation Requirements:**

<p>For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.</p> <p>It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: <a href="http://services.unimelb.edu.au/disability">http://services.unimelb.edu.au/disability</a></p>
