Subject Overview:	<p>This subject studies multiculturalism in the built environments of Australia and of South and Southeast Asia focusing on colonial encounters and postcolonial aspirations. Using race, class, gender and migration as theoretical starting points, it explores the geographical and spatial imperatives of colonial and national projects in domestic, institutional, and urban architectures. Ideas of orientalism, nationalism, modernity, and globalization will be examined in order to raise questions regarding the nature of postcolonial space, its historic tensions and its social transformations into new landscapes for pluralism and multiculturalism. Writings of Foucault, Bhaba, Said, Spivak, Hage, Lefebvre and the subaltern studies group will be read in conjunction with literature that applies these theories to specific architectural examples. Topics include explorations of modern subjectivities and urban communities that are shaped by ethnic diversity, aboriginality, feminist geography, myth, memory and the media.</p> <p>On completion of the subject students should be able to:</p> <ul style="list-style-type: none"> # Gain exposure to issues that can inform both the design and research orientations of students # Formulate, select or consolidate their design/research topics and projects for later years
