

785-BB Bachelor of Optometry

Year and Campus:	2009
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Level:	Undergraduate
Duration & Credit Points:	
Contact:	<p>Science Student Centre Old Geology building University of Melbourne Victoria 3010 AUSTRALIA Telephone +61 3 8344 6404 Facsimile +61 3 8344 5803 Web: http://www.science.unimelb.edu.au (http://www.science.unimelb.edu.au/)</p>
Course Overview:	<p>Optometry is a professional discipline based on the optical and visual sciences. The practice of optometry involves the diagnosis and treatment of functional disorders and diseases of the eye and vision: the optometrist's job is to solve patients' visual problems. The practice of optometry is regulated by Acts specific to each state of Australia. Under these Acts the practice of optometry can be carried out only by those whose names appear on the register of optometrists. Graduates holding the Bachelor of Optometry degree of the University of Melbourne are qualified to be registered for the practice of optometry in each state and territory of Australia and in New Zealand.</p>
Objectives:	<p>This course's objectives are for graduates to:</p> <ul style="list-style-type: none"> # have a sound foundation in the physical, chemical, mathematical and biological sciences, and in particular have a good knowledge and understanding of human biology; # understand the passage of light through lenses and optical systems (including the eye) and be able to predict and measure the nature and quality of optical images; # have a thorough knowledge and understanding of the performance and function of the human visual system; # understand the dysfunctions and diseases of the eye and visual system and know their genesis, natural course, treatment and prognosis; # have acquired skill in the techniques necessary for the examination of the eye and the assessment of visual function; # have developed skills in problem identification, in deciding on effective strategies to gather information for the resolution of these problems, in weighing evidence prudently and in making decisions and are able to apply these skills to scientific problems in the visual and clinical sciences as well as to particular problems presented by patients; # have developed the interpersonal and communication skills necessary in relationships with patients and professional colleagues and for the communication of the results of scientific enquiries; # are professionally competent in the practice of optometry and are able to gain registration (including therapeutic endorsement) by the appropriate professional body; # have the knowledge, skill and attitude to enable adaptation to scientific, technological and social change, have a sense of intellectual curiosity and a desire for lifelong learning and a capacity to be creative and innovative; and # have a strongly developed sense of professional and ethical responsibility for patients, colleagues and the community generally and are aware of the moral and legal responsibilities of professional practice.
Course Structure & Available Subjects:	<p>The Bachelor of Optometry is a five-year course in which the first year covers the fundamental sciences (the pre-optometry year) and the remaining four years comprise the Bachelor of Optometry.</p> <p>The structure of the Bachelor of Optometry may vary depending upon when a student commenced. Students who commenced the course in 2007 or earlier should refer to The 2007 Undergraduate Studies Handbook.</p>

Subject Options:**Pre-optometry year (1st year)**

The first year of the five year course is the pre-optometry year and covers the fundamental sciences

Compulsory subjects:

NB. An alternative sequence in chemistry may be available for students commencing with 610-171 Fundamentals of Chemistry.

Subject	Study Period Commencement:	Credit Points:
650-141 Biology of Cells and Organisms	Semester 1	12.500
650-142 Genetics & The Evolution of Life	Semester 2	12.500
610-101 Chemistry 1	Semester 1, Semester 2	12.500
610-102 Chemistry 2	Summer, Semester 2	12.500
655-111 Vision: How The Eye Sees The World	Semester 1	12.500
655-152 Optics: From Rainbows to Digital Imaging	Semester 2	12.500

Plus one of:

Subject	Study Period Commencement:	Credit Points:
640-111 Physics 1: Advanced	Semester 1	12.500
640-131 Physics 1	Semester 1	12.500
640-171 Physics 1: Fundamentals	Semester 1	12.500

Plus one of:

Subject	Study Period Commencement:	Credit Points:
640-112 Physics 2: Advanced	Semester 2	12.500
640-132 Physics 2: Physical Science & Technology	Semester 2	12.500
640-172 Physics 2: Life Sciences & Environment	Semester 2	12.500

Bachelor of Optometry (2nd year)

Second year of the Bachelor of Optometry course.

Completion of 100 points of study.

All compulsory subjects.

Subject	Study Period Commencement:	Credit Points:
655-201 Anatomy & Histology of the Eye	Semester 1	12.500
536-206 Physiology (Optometry)	Semester 1	12.500
521-204 Biochemistry and the Eye	Semester 1	12.500
655-221 Human Visual Functions	Semester 1	12.500
531-202 Basic Principles of Pathology-Optometry	Semester 2	12.500
620-272 Applied Statistics for Optometrists	Semester 2	12.500
655-210 Optical Design and Ophthalmic Metrology	Semester 2	12.500
655-222 Visual Processing and Control	Semester 2	12.500

Bachelor of Optometry (3rd year)

Third year of the Bachelor of Optometry course.

Completion of 100 points of study.

All compulsory subjects.

Subject	Study Period Commencement:	Credit Points:
534-307 Pharmacology (Optometry)	Semester 1	12.500
655-328 Neural Basis of Vision	Semester 1	12.500
655-341 Ocular Histopathology	Semester 1	12.500
526-306 Microbiology and Immunology (Optometry)	Semester 2	12.500
655-321 Practical Problems in Vision	Semester 2	12.500
655-351 Ophthalmic Lenses and Dispensing	Semester 2	12.500
655-330 Functional Disorders of Vision	Year Long	25.000

Bachelor of Optometry (4th year)

Fourth year of the Bachelor of Optometry course.

Completion of 100 points of study.

All compulsory subjects.

Subject	Study Period Commencement:	Credit Points:
655-451 Contact Lenses	Semester 1	12.500
655-461 Assessment of Ocular Disease	Semester 1	12.500
655-422 Occupational Optometry, Visual Standards	Semester 2	12.500
655-462 Therapeutic Management of Ocular Disease	Semester 2	12.500
655-430 Clinical Optometry Practice	Year Long	25.000
655-441 Diagnosis of Ocular Disease I	Semester 1	12.500
655-442 Diagnosis of Ocular Disease II	Semester 2	12.500

Bachelor of Optometry (5th year)

Fifth year of the Bachelor of Optometry course.

Completion of 100 points of study.

All compulsory subjects.

NB. The fifth year of the Bachelor of Optometry is 32 weeks.

Subject	Study Period Commencement:	Credit Points:
655-510 General Optometry Practice	Year Long	25.000
655-520 Specialist Optometry Practice	Year Long	25.000
655-540 Ocular Disease Management	Year Long	25.000
655-530 Project Studies in Vision Sciences	Year Long	25.000

Entry Requirements:

For the most up-to-date admission requirements visit:

	http://www.futurestudents.unimelb.edu.au (http://www.futurestudents.unimelb.edu.au)
Core Participation Requirements:	It is University policy to take all reasonable steps to minimise the impact of disability upon academic study and reasonable steps will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact upon their active and safe participation in a subject are encouraged to discuss this with the relevant subject coordinator and the Disability Liaison Unit.
Graduate Attributes:	<p>Optometry is a professional discipline based on the optical and visual sciences. Optometry graduates from the University of Melbourne are qualified health professionals able to practice within Australia and in a number of other countries. The optometry graduate has the knowledge, understanding and skills necessary to effectively practice in their profession. Accordingly, they: have a thorough knowledge and understanding of the performance and function of the human visual system; understand the dysfunctions and diseases of the eye and visual system and know their genesis, natural course, treatment and prognosis; and have acquired skill in the techniques necessary for the examination of the eye and the assessment of visual function. In addition, they have developed skills in problem identification, in deciding on effective strategies to gather information for the resolution of these problems, in weighing evidence prudently and in making decisions and are able to apply these skills to scientific problems in the visual and clinical sciences as well as to particular problems presented by patients. Optometry graduates also have the interpersonal and communication skills necessary in relationships with patients and professional colleagues and for the communication of the results of scientific enquiries. They are professionally competent in the practice of optometry and are able to gain registration by the appropriate professional body. They have a strongly developed sense of professional and ethical responsibility for patients, colleagues and the community generally and are aware of the moral and legal responsibilities of professional practice. In the longer term these graduates have the knowledge, skill and attitude to enable adaptation to scientific, technological and social change. They have a sense of intellectual curiosity and a desire for lifelong learning and a capacity to be creative and innovative. These attributes enable them to continue to develop their own professional abilities as well as contributing to the development of the profession as a whole and the understanding of the vision sciences.</p>
