

800-175 An Ecological History of Humanity

Credit Points:	12.50
Level:	1 (Undergraduate)
Dates & Locations:	2009, This subject commences in the following study period/s: Semester 1, - Taught on campus.
Time Commitment:	Contact Hours: Two 1-hour lectures and a 1-hour tutorial per week Total Time Commitment: Not available
Prerequisites:	None
Corequisites:	None
Recommended Background Knowledge:	None
Non Allowed Subjects:	136-175 The Ecological History of Humankind
Core Participation Requirements:	<p>For the purposes of considering request for Reasonable Adjustments under the Disability Standards for Education (Cwth 2005), and Student Support and Engagement Policy, academic requirements for this subject are articulated in the Subject Overview, Learning Outcomes, Assessment and Generic Skills sections of this entry.</p> <p>It is University policy to take all reasonable steps to minimise the impact of disability upon academic study, and reasonable adjustments will be made to enhance a student's participation in the University's programs. Students who feel their disability may impact on meeting the requirements of this subject are encouraged to discuss this matter with a Faculty Student Adviser and Student Equity and Disability Support: http://services.unimelb.edu.au/disability</p>

Subject Overview:	An Ecological History of Humanity or 'How we got to where we are", journeys through 150,000 years of human experience: climate change, the great migrations, health and disease, famine and plenty, war and peace, scientific and technological advance—to conclude in our own times. This story concentrates on the deep history of human societies and their needs for food, shelter and reproduction, and of our quests for love, meaning and power. It explores key transitions: the emergence of farming and complex societies; the rise and fall of empires; calamities such as the Black Death and the micro and macro-biological conquests of the Americas and Australia; El Niño holocausts and the long cycles of global cooling and warming; the fossil fuel revolution and the urbanization of the world. Taught by a geographer, a zoologist, a microbiologist and an historian, it is an interdisciplinary exploration of our complex relationships with the environment past and present, with other organisms, and with each other.
Assessment:	Two (2) tutorial papers of 500 words each, due 3 days before relevant tutorial (20%)One research report of 2000 words due at the end of week 12 (50%)One one-hour (60 minutes) reflective essay examination in the examination period (20%)Tutorial attendance and participation (10%)
Prescribed Texts:	Clive Ponting, (2007) <i>A New Green History of the World</i> , Penguin Books.A workbook, online reading and interactive website will be prepared by the teaching staff.
Recommended Texts:	JR McNeill, (2001) <i>Something New Under the Sun</i> , Penguin Books.
Breadth Options:	This subject potentially can be taken as a breadth subject component for the following courses: # Bachelor of Arts (https://handbook.unimelb.edu.au/view/2009/D09)

	<p># <u>Bachelor of Biomedicine</u> (https://handbook.unimelb.edu.au/view/2009/J07)</p> <p># <u>Bachelor of Commerce</u> (https://handbook.unimelb.edu.au/view/2009/F04)</p> <p># <u>Bachelor of Environments</u> (https://handbook.unimelb.edu.au/view/2009/A04)</p> <p># <u>Bachelor of Music</u> (https://handbook.unimelb.edu.au/view/2009/M05)</p> <p># <u>Bachelor of Science</u> (https://handbook.unimelb.edu.au/view/2009/R01)</p> <p># <u>Bachelor of Engineering</u> (https://handbook.unimelb.edu.au/view/2009/355-AA)</p> <p>You should visit learn more about breadth subjects (http://breadth.unimelb.edu.au/breadth/info/index.html) and read the breadth requirements for your degree, and should discuss your choice with your student adviser, before deciding on your subjects.</p>
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Generic Skills:	<p>Students who successfully complete this subject will</p> <ul style="list-style-type: none"> # in precis, abstract extraction and analytic note-taking # in structuring knowledge # in interdisciplinary group work # in knowledge transfer via. posters. webpages and essays, and in conference presentation <p>development of 'literacies' in a range of disciplines across the physical and social sciences</p>
Notes:	This subject is available for science credit for students enrolled in the BSc (pre-2008 degree only), or a combined BSc course (except for the BA/BSc).
Related Majors/Minors/Specialisations:	Cross Cultural Communication
