

957-AM Bachelor of Engineering (Mechanical & Manufacturing) and Bachelor of Arts

Year and Campus:	2009
Fees Information:	Subject EFTSL, Level, Discipline & Census Date, http://enrolment.unimelb.edu.au/fees
Level:	Undergraduate
Duration & Credit Points:	
Contact:	<p>Enquiries: Arts & Music Student Centre Rm 104 (Ground Floor) Old Arts Building</p> <p>Location (PDF, 1027kb) (http://www.pb.unimelb.edu.au/CampusMaps/Parkville_P.pdf)</p> <p>Tel: +61 3 8344 5235 Fax: +61 3 9347 0424 Search for an answer or send an email via our queries database: http://arts-unimelb.custhelp.com/ (http://arts-unimelb.custhelp.com/)</p> <p>Engineering Student Centre Ground Floor, Old Engineering Building The University of Melbourne Victoria 3010 AUSTRALIA Tel: +61 3 8344 6703 Fax: +61 3 9349 2182 Email http://eng-unimelb.custhelp.com (Engineering%20Student%20Centre%20%20Ground%20Floor,%20Old%20Engineering%20Building%20The%20University%20of%20Melbourne%20Victoria%203010%20AUSTRALIA%20%20Tel:%20+61%203%208344%206703%20Fax:%20+61%203%209349%202182%20%20Email%20http://eng-unimelb.custhelp.com)</p>
Course Overview:	<p>The Department of Engineering was first established after the Second World War, although the course in mechanical engineering began in 1907 as a Faculty stream. An industrial engineering degree was added in the late 1950s. In 1988 an extensive review of the curriculum led to the undergraduate courses being restructured into a new, single degree course in mechanical and manufacturing engineering with students having the option to choose specialisations in their last year. A 1995 review of the department by a team from the US and UK ranked its research and teaching at the highest international standards. In 1996, the five-year combined degree in mechatronics commenced. Mechanical and manufacturing engineering applies human and material resources to the design, construction, operation and maintenance of machines (supported increasingly by sophisticated computer technology) to move people, goods and materials; generate energy; produce goods and services; and control pollution and dispose of wastes. It interacts with all other branches of engineering including the medical sciences.</p> <p>The combined degree of Bachelor of Engineering (Mechanical and Manufacturing)/Bachelor of Arts requires a total of 500 points over five years. Students are required to complete 300 points of Engineering subjects and 200 points of Arts subjects.</p> <p>First-year students acquire a broad scientific training in mathematics and computing and an introduction to engineering and their choice of Arts subjects.</p> <p>Second-year students continue with mathematics and are introduced to engineering design plus basic mechanical engineering sciences (thermodynamics, fluid mechanics, mechanics and machine dynamics) and materials.</p> <p>Third year students continue mechanics and machine dynamics, and are introduced to electro-mechanical system modelling. Half the year is devoted to studies in Arts.</p> <p>Fourth year is concerned with thermodynamics, fluid mechanics, design, manufacturing and control, as well as further Arts studies.</p> <p>Fifth year includes a major project and an elective in advanced engineering. Many students participate in industry challenges such as the Formula SAE-A competition, or other build and demonstrate projects that are world competitive.</p> <p>In laboratory, research and design work students have access to specialised facilities for materials testing, wind tunnels, engine test cells and a heavy engineering workshop for the manufacture of testing facilities and experimental equipment.</p>

	<p>Engineering design, which draws on the Faculty's extensive computer facilities and computational mechanics, is now established as an area of study and research in conjunction with computer science.</p> <p>Graduate research programs are available in aspects of mechanical, mechatronics, manufacturing and bioengineering. The department is internationally regarded in fluid mechanics, advanced automotive engineering technology, machine dynamics, mechatronics and biomedical engineering.</p> <p>The Bachelor of Arts (BA) offers unique flexibility with the opportunity to focus on a major chosen from a broad range of Arts study options in the humanities, social sciences and languages.</p> <p>Students can:</p> <ul style="list-style-type: none"> # Undertake specialised fieldwork, research options and integrated internship programs which provide opportunities for professional work experience and community engagement. # Broaden your horizons and undertake international study exchange at any one of 120 universities worldwide, receiving credit towards your Melbourne Arts degree. # Study a new language with most areas available from beginners to advanced level. # Benefit from studying with high achieving local and international students with Melbourne Arts having the highest entry requirements for arts disciplines in Australia. # Learn from internationally recognised scholars and industry professionals. # Create pathways into further postgraduate study in professional Arts Masters courses, Melbourne Model Graduate Professional Degrees, and with the completion of an Honours year, entry into research higher degrees in Arts. # Enjoy a rewarding professional career, with Melbourne Arts graduates enjoying employment rates well above the national Arts average. 			
<p>Objectives:</p>	<p>The Bachelor of Arts has as its objectives that graduates:</p> <ul style="list-style-type: none"> * can demonstrate a sound knowledge and understanding of selected fields of studies in the humanities, languages and social and behavioural sciences; * can access and appreciate national and international debates in their areas of study; * can demonstrate an independent approach to knowledge that uses rigorous methods of inquiry and appropriate theories and methodologies that are applied with intellectual honesty and a respect for ethical values; * can apply critical and analytical skills and methods to the identification and resolution of problems within a changing social context; * can act as informed and critically discriminating participants within the community of scholars, as citizens and in the work force; * can communicate effectively and, in the case of those students undertaking a language major, are able to read, write and speak another language with fluency and appreciate its cultural context; * qualify for employment in a wide range of occupations; * have a continuing commitment to learning; * are proficient in the use of appropriate modern technologies, such as the computer and other IT systems, for the acquisition, processing and interpretation of data. 			
<p>Course Structure & Available Subjects:</p>	<p>The recommended or standard course structures for engineering are listed below. When setting the timetable every effort will be made to avoid clashes between the times of classes associated with these sets of subjects. Students should be aware however, that if it proves to be impossible to achieve a timetable without clashes in these sets of subjects, the Faculty reserves the right to modify course structures in order to eliminate the conflicts. Students will be advised during the enrolment period of the semester if the recommended courses need to be varied. Where the courses include elective subjects these should be chosen so that timetable clashes are avoided. In particular, students in combined degrees should plan their courses so that the subjects chosen in the other faculty do not clash with those recommended for the engineering component.</p>

<p>Subject Options:</p>	<p>Arts Requirements:</p> <p>All students in the Bachelor of Arts and Bachelor of Engineering (Mechanical and Manufacturing) are required to complete 200 points of Arts subjects of which;</p> <ul style="list-style-type: none"> * 50 points must be taken at first year level; * 75 points must be taken at second year level and; * 75 points must be taken at third year level. <p>All Arts subjects undertaken must be from the following arts-approved study areas (see the major's description for full details):</p> <ul style="list-style-type: none"> * all language subjects * American studies * Ancient, Medieval and Early Modern Studies (some non-arts approved subjects included) * Anthropology * Art History * Asian Studies (some non-arts approved subjects included) * Australian Indigenous Studies (some non-arts approved subjects included) * Australian Studies * Cinema Studies * Classical studies and Archaeology * Creative Writing * Criminology * Cultural Studies * Development Studies (some non-art approved subjects included) * English Literary Studies * English as a Second Language * English Language Studies * Environmental Studies (some non-arts approved subjects included) * European Studies * Gender Studies * Geography * Hebrew and Jewish Studies * History * History and Philosophy of Science * International Studies * Islamic Studies * Linguistics and Applied Linguistics * Philosophy * Planning and Design * Political Science * Psychology * Social Theory * Socio-legal Studies * Theatre Studies <p>THERE WILL BE NO FIRST YEAR ENTRY INTO THIS COURSE FROM 2008.</p> <p>Third Year</p>

Subjects listed below **MUST** be taken in this approved order, regardless of semester availability.

Semester 1

Subject	Study Period Commencement:	Credit Points:
436-353 Mechanics 2	Semester 1	12.500

Arts subject(s) as required (37.5 points)

Semester 2

Subject	Study Period Commencement:	Credit Points:
436-354 Mechanics 3	Semester 2	12.500
436-204 Systems Modelling	Semester 2	12.500
620-370 Statistics for Mechanical Engineers	Semester 2	12.500

Arts subject as required (12.5 points)

Fourth Year

Subjects listed below **MUST** be taken in this approved order, regardless of semester availability.

Semester 1

Subject	Study Period Commencement:	Credit Points:
436-384 Engineering Design & Processes 1	Semester 1	12.500
436-351 Thermofluids 2	Semester 1	12.500
436-382 Control Systems 1	Semester 1	12.500

Arts subject as required (12.5 points)

Semester 2

Subject	Study Period Commencement:	Credit Points:
436-311 Engineering Design & Processes 2	Semester 2	12.500
436-352 Thermofluids 3	Semester 2	12.500

Arts subject(S) as required (25 points)

Fifth Year

Subjects listed below **MUST** be taken in this approved order, regardless of semester availability.

Year Long

Subject	Study Period Commencement:	Credit Points:
436-492 Major Project and Professional Practice	Year Long	25.000

Semester 1

Mechanical Elective Group 1 (12.5 points)

Arts Subject(S) as required (25 points)

Mechanical Elective Group 1

Select one elective from the group below:

Subject	Study Period Commencement:	Credit Points:
436-431 Mechanics 4	Semester 1	12.500
436-432 Thermofluids 4	Semester 1	12.500

	436-470 Control Systems 2	Semester 1	12.500
	Semester 2 Arts subject(s) as required (37.5 points)		
Entry Requirements:	There is no further entry into this combined course.		
Core Participation Requirements:	The Bachelor of Arts requires a standard level of ability across all disciplines. It will be assumed students are able to access and attend classes on a regular basis, are capable of learning in a University environment and will be able to take responsibility for their own learning. Any ability beyond this threshold will be robustly supported through the curriculum. There are no pre-requisites for first year subjects, and any intensive use of IT or technologies will be adequately supported. Certain subjects have more specific requirements and demands, such as fieldwork or travelling, which are clearly outlined in the subject description. The University is dedicated to provide support to those with special requirements. The Faculty Disability Contact Officer works with students, the University Disability Liaison Unit and teaching staff to assist students with their special requirements, with a particular focus on accommodations for in-class and examination assessment tasks. Further details on the disability support scheme can be found at the Disability Liaison Unit website.		
Further Study:	<p>Honours Depending on your major area of study, you have the option of applying for an Honours year after completing your BA, which will include a research project. For more information on entry to Honours, see the Arts webpage (http://www.arts.unimelb.edu.au/futurestudents/programs/Honours.html) .</p> <p>Coursework Masters If you wish to continue your professional studies at postgraduate level, the studies you undertake in your major can provide a direct pathway to Coursework Masters Degrees in areas such as editing, media and communications, public policy and management, international studies, arts management, development studies and many more. Entry is based on academic merit and in most cases requires a Bachelors degree or equivalent in the relevant study area. You will also be well-prepared to undertake a Melbourne Model Graduate Professional Degree in areas such as law, teaching and commerce.</p> <p>For more information on entry into a coursework masters degree, see the Arts coursework programs webpage (http://www.arts.unimelb.edu.au/futurestudents/programs/pg-programs.html) , or the University graduate programs webpage (http://www.futurestudents.unimelb.edu.au/grad/) .</p> <p>Research Higher Degrees If you wish to undertake advanced research and explore particular study areas in more depth, there will be opportunities to proceed to a range of Research Higher Degrees at masters and doctoral level. For more information about research higher degree study in Arts, see the Arts webpage (http://www.arts.unimelb.edu.au/futurestudents/research/) .</p>		
Graduate Attributes:	See course objectives		
Generic Skills:	<p>Arts students are encouraged to pursue their academic interests and professional aspirations by taking a variety of subjects in a range of different areas of study. All arts subjects provide students with transferable generic skills that prepare them for further study and the workplace.</p> <p>As a result of attendance at scheduled classes, participation in planned activities and discussion groups, and timely completion of essays and assignments, arts graduates should acquire transferable generic skills in the following areas:</p> <ul style="list-style-type: none"> # research through competent use of the library, electronic databases, and other information sources, and the definition of areas of inquiry and methods of research; # critical thinking and analysis through recommended reading, essay writing and tutorial discussion, and by determining the strength of an argument; # thinking in theoretical terms through lectures, tutorial discussion, essay writing and engagement in the methodologies of the humanities and social sciences; 		

thinking creatively

through essay writing, creative writing, tutorial discussions and presentations, conceptualising theoretical problems, forming judgements and arguments from conflicting evidence and by critical analysis;

understanding of social, ethical and cultural context

through the contextualisation of judgements, developing a critical self-awareness, being open to new ideas and possibilities and by constructing an argument;

communicating knowledge intelligibly and economically

through essay writing and tutorial and seminar discussion;

written communication

through essay preparation and assignment writing;

public speaking

through tutorial and seminar discussion and class presentations;

attention to detail

through essay preparation and writing, and examination revision;

time management and planning

through managing and organising workloads for recommended reading, essay and assignment completion and examination revision;

teamwork

through joint projects and group discussions.
