| Subject Overview: | <p>This subject was formerly called Architecture Design Studio 1.</p> <p>The core of the undergraduate design sequence is the development of both design thinking and dexterity with tools. The focus of this design subject will be generating design ideas, translating them into architectural form/space/materials/programme, refining the architecture through consideration of arrival, circulation, light, views etc and communicating the architectural proposition through 2D and 3D visual media and oral presentations. Linking these investigations will be the theme of earth, which will be explored conceptually, metaphorically, structurally and technologically – e.g. a grounding in considerations of site, topography, context, material investigations, compositional methods, foundational ideas.</p> | | | | | | | | | | | | |
| Objectives: | <p>For students to:</p> <ul style="list-style-type: none"> # demonstrate an ability to interrogate a brief; # demonstrate an ability to generate a variety of design possibilities for a given situation; # develop drawing, drafting and modelmaking skills; | | | | | | | | | | | | |

| | |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <ul style="list-style-type: none"> # demonstrate an understanding of relationships between architecture and earth through the application of the first three points above; # develop the ability to make a case for proposals. |
| Assessment: | Series of short assessment tasks due weekly for first half of semester (30%); Second project assessment due week 12 (50%); Visual diary due week 13 (10%); Contribution to studio culture (10%). Total of all assessment tasks is equivalent to 5000 words. |
